SENATE BILL NO. 240

IN THE LEGISLATURE OF THE STATE OF ALASKA

NINETEENTH LEGISLATURE - SECOND SESSION

BY THE SENATE RESOURCES COMMITTEE

Introduced: 1/26/96
Referred: Resources

A BILL

FOR AN ACT ENTITLED

"An Act relating to the statewide bonding pool for the reclamation activities imposed on mining operations, and extending the pool’s use to surface coal mining projects."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 27.19.040(b) is amended to read:

(b) The commissioner shall establish a statewide bonding pool for mining operations as an alternative to individual performance bonds. A miner participating in the bonding pool shall contribute an initial deposit not to exceed 15 percent of the reclamation bond plus an additional nonrefundable annual fee not to exceed five percent of the reclamation bond. The commissioner shall refund the 15 percent deposit upon satisfactory completion of the approved reclamation plan. If requested by the miner, the commissioner may apply the deposit to a new reclamation plan. In addition to its use for mining operations under this chapter, the commissioner shall allow the bonding pool to be used to meet the
requirements of AS 27.21.160.

* Sec. 2. AS 27.21.080(a) is amended to read:

(a) A permit issued under this chapter includes the right of successive renewal upon expiration, for areas within the boundaries of the permit area. An opponent of renewal of a permit has the burden of proving that the permit should not be renewed. Subject to (c) of this section, if a permittee applies for renewal of the permit, the commissioner shall renew the permit after public notice is given in the manner provided in AS 27.21.130 unless the commissioner finds, in writing, that

(1) the terms and conditions of the permit have not been satisfactorily met, and the permittee has not demonstrated to the satisfaction of the commissioner that the permittee is meeting and will continue to meet a schedule set by the commissioner under AS 27.21.240(a) or (b) for correcting a permit violation;

(2) the surface coal mining and reclamation operation of the permittee is not in compliance with the environmental protection standards of this chapter and regulations adopted under it;

(3) the requested renewal substantially jeopardizes the permittee’s continuing responsibility on existing permit areas;

(4) the permittee has not either

(A) provided sufficient evidence that the performance bond under AS 27.21.160 in effect for the operation will continue for the renewal period requested in the application, and that any additional bond required by the commissioner under AS 27.21.160 will be obtained; or

(B) when seeking to use the statewide bonding pool for mining operations established under AS 27.19.040(b), complied with all requirements of the bonding pool; or

(5) information required by the commissioner in accordance with this chapter has not been provided by the permittee.

* Sec. 3. AS 27.21.140(d) is amended to read:

(d) If the application is approved, the permit shall be issued upon filing of the performance bond required by AS 27.21.160 or satisfactory compliance with the requirements of the statewide bonding pool for mining operations established
under AS 27.19.040(b).

* Sec. 4. AS 27.21.160(a) is amended to read:

(a) Except as provided in (c) and (g) of this section, after an application for a permit has been approved and before the permit may be issued, the applicant must file with the commissioner, on a form prescribed and furnished by the commissioner, a performance bond payable to the State of Alaska and conditioned on faithful performance of the requirements of this chapter and the permit. The bond must cover the area of land within the permit area on which the applicant will initiate and conduct surface coal mining and reclamation operations within the initial term of the permit. As succeeding increments of surface coal mining and reclamation operations are initiated and conducted within the permit area, the permittee shall provide an additional bond or bonds to cover those increments in accordance with this section. The amount of the bond required for an area within the permit area shall be determined by the commissioner and shall reflect the probable difficulty of the reclamation considering the topography, geology, hydrology, revegetation potential, and similar factors relating to the area. The amount of the bond must be sufficient to assure the completion of the reclamation plan by the commissioner in the event of forfeiture and, for the entire permit area, may not be less than $10,000.

* Sec. 5. AS 27.21.160 is amended by adding a new subsection to read:

(g) As an alternative to performance bonds, applicants conducting surface coal mining and reclamation operations may use the bonding pool established by the commissioner under AS 27.19.040(b) for reclamation activities to meet the requirements imposed by this section.

* Sec. 6. AS 27.21.998(11) is amended to read:

(11) "permit area" means the area of land indicated on the approved maps submitted by the operator with the application which must be covered by the operator’s bond as required by AS 27.21.160(a) - (f) or by the individual performance and payment requirements for the operator who participates in the statewide bonding pool for mining operations as authorized by AS 27.21.160(g), [AS 27.21.160] and must be readily identifiable by appropriate markers on the site;
