STATE OF ALASKA
2017 LEGISLATIVE SESSION

Analysis

The Department submits this revised fiscal note after further consideration of the amendments to the bill in House Judiciary regarding the Alcohol Safety Action Program.

The House Judiciary committee amended SB 54 to require the program to manage a wider range of referrals. The committee also left in place the screening and intensive monitoring requirements that were new to the ASAP program as a result of the passage of SB 91 SLA 2016.

The current version of SB 54 will result in an increase in new persons to be served. However, because regulations are still under development, and the Department has not yet determined the amount of services and monitoring each individual will receive, the department is unable at this time to determine with specificity the amount of resources this change might require.

If SB54 is enacted with the proposed House Judiciary change to the ASAP program intact, the Department would expect a modest increase in referrals during the remainder of FY2018, as it will take some time for individuals subject to the requirements to proceed through the justice system. No new resources are anticipated to be needed for the remainder of this fiscal year.

As for FY2019 and beyond, it is possible that the Department may be able to handle the increase in admissions to the program as a result of its newly adopted regulatory refinements to the program, or, the Department may find that the proposed refinements have an impact on the increasing numbers of admissions, in which case there is the potential that the Department would need up to two (2) new probation officers (at a total cost of approximately $180.0 annually for salary, benefits, and commodities) to handle the screening and intensive monitoring of the increased numbers. The need for resources will depend on the number of referrals made by courts, the amount of work each referral requires based on a determination of the risks and needs present, the amount of intensive monitoring needed, and other factors.

Also note that individuals referred to the ASAP program pay a fee to participate in the program, so increased referrals to the program will be offset by these receipts. The program currently has flexibility within its appropriated fee authority and sees no need for an authority increase.
