**Subject:** Support of HB 271

I would like to urge support for this legislation. Our company employs approximately 40 temporary drivers for the summer construction season. Most of these temps must have the DOT medical exam & certificate to drive pickup-truck type vehicles. Passage of this legislation would clearly be beneficial to our company to simplify our employee preparation processes. Although the actual dollar affect to our company would be relatively small by enacting HB271, any reduction in our operating expenses would, by tariff, reduce our chargeable expenses to our customers, which is everyone who uses natural gas.
