

Sb 37

Chair Wilson!  
Members of the committee!

For the record,

My name is Irina Obolentseva. I am a resident of Delta Junction, AK. I represent my family. I actually think this is great that you take time to listen to public testimonies. I really appreciate it!

I oppose Sb 37, because vaccines cause Autism and mortality in children.

Dr. William Thompson, the senior scientist at the CDC, has provided a statement through his attorney. This is what it says: HHS omitted statistically significant information showing an association between the MMR vaccine and Autism in the first and ONLY MMR-autism study ever conducted by HHS with American children.

Dr. Peter Aaby is renowned for studying and promoting vaccines in Africa with over 300 published studies. He was a leader of a study, published in 2017, which found that children vaccinated with DTP vaccine were 10 times more likely to die in the first 6 months of life than those children that were Unvaccinated. Dr. Aaby states: All currently available evidence suggests that DTP vaccine may kill more children from other causes than it saves from diphtheria, tetanus or pertussis.

It is individual's choice to vaccinate or not. But we should NOT pay for such unsafe product as vaccines are. And definitely should not promote vaccines that cause autism and mortality in children. <sup>Please, look for</sup> ~~provide~~ supporting documents on the information I presented. Please, vote NO on SB37. ThankYou
