83	-	-	-	-	-	-	172.4	-	-	-	-	-	-	-
Notes:														
(1) The Department of Revenue's Fall 2017 oil forecast for FY18 is 0.533 mbd at \$56.00 per barrel, the FY19 forecast is 0.526 mbd at \$57.00 per barrel.														
(2) There are two adjustments to the revenue forecast due to late corporate dividend announcements: AHFC is reduced by \$12.6 million and AIDEA is reduced by \$5.3 million.														
(3) The FY18 revenue forecast reflects the minimum (25%) deposit to the Permanent Fund. The forecast for FY19 has an additional \$56.5 million going to the Permanent Fund, while the Governor's budget proposes reducing the deposit to the minimum required, thereby increasing general fund revenue.														
(4) Carryforward is money that was appropriated in a prior year that is made available for spending in a later year via multiyear appropriations. Repairs increase revenue by reducing prior year authorization. Total carryforward into FY19 will be unknown until the close of FY18. Resappropriations to operating budget funds are counted as UGF revenue.														
(5) Restricted revenue equals spending for each category. Designated general funds include 1) program receipts that are restricted to the program that generates the receipts and 2) revenue that is statutorily designated for a specific purpose. Other funds have stricter restrictions on usage, and federal funds originate from the federal government and can be used only for a particular purpose.														
(6) Duplicated authorization is in the budget twice, such as when funds flow in and out of a holding account or one agency pays another for services provided. Duplicated authorization also includes the expenditure of bond proceeds when debt service on bonds (which includes repayment or principal) will be reflected in future operating budgets.														
(7) Including duplicated fund sources in the amount of capital spending provides a valuable measure of "money on the street" because it includes projects funded with bond proceeds and other duplicated fund sources.														
(8) The post transfer deficit for FY18, estimated to be \$2.2 billion, will be drawn from the Constitutional Budget Reserve. The FY19 deficit will be drawn from the CBR, SBR, and other sources (see note 12).														
(9) "Fund Transfers" refer to appropriations that move money from one fund to another within the Treasury. Although transfers are not true expenditures, they reduce the amount of money available for other purposes so must be included in the calculation of the surplus/deficit. For reserve accounts, a positive number indicates a deposit and a negative number indicates a withdrawal. When money is withdrawn and spent, the expenditure is included in the operating or capital budget, as appropriate.														
(10) Typically, supplemental requests are not included in the Governor's December 15 budget submission. The Governor submitted several supplemental items in the operating budget, but has until the 15th day of the legislative session to submit all supplemental requests. The CBR vote for the FY18 budget allowed for up to \$200 million of UGF supplemental appropriations.														
(11) The Governor's budget includes several items that require additional legislation to enact, which are listed here. In addition, the Governor's budget directly paid for items out of the CBR, which requires a supermajority vote. For clarity, these items are shown as a typical CBR draw.														
(12) The Governor's budget has a fixed CBR draw of \$425.5 million. The SBR contains \$172.4 million, so draws from it must be limited to that amount. That leaves a remaining deficit of \$73.8 that is unaddressed in the Governor's budget.
