## FISCAL NOTE ANALYSIS

STATE OF ALASKA  
2018 LEGISLATIVE SESSION

BILL NO. HB 217

### Analysis

The Department of Environmental Conservation has broad authority over the manufacture and sale of food products in Alaska. This bill would exempt manufacturers of potentially hazardous foods (raw milk, shellfish, poultry and poultry products, etc.) from licensing, permitting, certification, packaging, and inspection requirements if certain conditions are met.

The Department would maintain the statutory responsibility to ensure that food sold or offered to the public is safe for human consumption. The Department would use existing resources to provide extensive public outreach on the known dangers of consuming raw milk and other potentially hazardous foods that fall under the exemption. Increased response to food borne illness outbreaks related to raw milk may strain existing staff resources, but the cost of increased time and materials is impossible to reasonably estimate therefore the Department is submitting an indeterminate fiscal note.
