Subject: Support HB 118

My name is Mike Coons from Wasilla and speaking for myself.

I fully support HB 118!

My wife and I went to see “The Sound of Freedom”. Any reasonable person that saw that film was enraged! If someone wasn't, they were either not human or one of the people that believe that people can be used as cattle for any and all aspects of slave labor and depravity!

I have read the bill and this council will be comprised of people that will have the expertise and passion to put a stop to this evil industry and yes, those that do this consider it to be just that, an industry.

A drug dealer can sell a kilo of dope to a street pusher, whom can cut that to several kilo's of death, but each nickel or dime bag is consumed. Thus the dope has to be replenished. Human and sex trafficking is a far better “business model”. That person can be used over and over again. He or she can be sold and passed from one abuser to another at will. This isn't just sex trafficking, which is horrific in and of itself, but just as sinister aspect is what we once called “sweat shops”. Where a child or adult can be forced to work hours upon end in far more deplorable work environments that were in the 1920's and 30's! These people can be worked until they are killed by any number of reasons! I would not be surprised if those that were once used for sex trafficking and now no longer considered “desirable” are then put into such sweat shops until they are dead. The millions of dollars the cartels get off just one slave is uncalcuable!

In closing, to the Democrats on this committee, the Democrat party by supporting illegal alien entry into our nation are directly part of this human trafficking. The criminal illegal aliens now being apprehended and deported are being supported by these same Democrats in trying to keep them in the US and free to continue the death of US Citizens! I do hope that Alaskan Democrats show that they are more humane than the likes of AOC, Jeffries, Maxine Waters, etc.!
