Subject: please pass HB 27

Dear House Resources Committee,

As a mother of two young children, I am strongly in support of HB 27. I try to avoid harmful chemicals, but it's often hard to even know whether products actually contain harmful chemicals. HB 27 is a step in the right direction and will help to keep all children in Alaska safe and healthy.

Thank you to Geran for sponsoring this bill. I urge you all to pass HB 27 out of the Resources Committee.

Thank you,

Rebecca Noblin

Subject: Please schedule a hearing for HB 53 and HB 27

Dear Legislators of the House Resources Committee,

Is there any defensible reason for toxic ingredients in children's toys and other children's products? Is there any defensible reason not to take action now to ban these ingredients from toys and other children's products? Please take up HB 53 and 27 ASAP. We owe it to our children.

I am deeply concerned about the health effects of toxic chemical fire retardants on Alaskan children and firefighters. These chemicals are associated with miscarriages, premature births, cancer, developmental harm, and neurological impairment.

I urge you to support a healthy Alaskan community free of exposures to toxic fire retardants in children's toys and upholstered furniture by scheduling a hearing on the resources committee for HB 53 and HB 27.

Thank you.

Sincerely,

Marshall Clymer
