

HB 111 – Form letter of Opposition, signed by 373 Alaskans and many others

Dear Alaska House Fisheries Committee,

I am writing in strong opposition to HB 111: Finfish Farms and Products. Alaska's wild fisheries are significant in supporting Alaska Native communities, filling our freezers, and driving our economy. Allowing non-native fish species to be farmed here poses a grave risk to our wild stocks, even in "contained" environments.

Diseases can be spread by airborne vectors such as birds or during potential escape from enclosures such as floods or negligence. The rearing of farm fish in Alaska would also directly undermine efforts to market the unique taste and nutritional benefits of Alaska wild fisheries and directly compete in the marketplace with small boat harvesters. If the state legislature allows fish farming of non-salmon species, this would only make it easier for salmon farming to become a reality in the future. Please do not allow fish farming in Alaska and instead prioritize wild stocks when it comes to our food security. A renewed focus on sound management and protection of the spawning and rearing habitat of salmon and other species is the most effective and beneficial way of enhancing Alaska's food security. Please reject HB 111.

Sincerely,

STACIE CHARLEBOIS
