April 20, 2017

Dear Senator MacKinnon,

The Cordova Telephone Cooperative (CTC) can provide nearly any broadband speeds to the Cordova School district they might want. Five years ago CTC invested \$14 million in an undersea fiber optic cable to connect us to the world and removed us from satellite connectivity for ever. We operate an OC-192 between Cordova and Valdez and ACS provides our transport from there to the POP in Oregon.

Thank you for your interest in the broadband provisioning to our schools.

Paul Kelly
