Senate Finance Committee Members

I am concerned with the House changes to Sec 14b of HB409. The original bill lowered the requirements that violators of our mandatory auto insurance law be required to show proof of insurance at time of registration from life to 10 years (Sec 11 of original version). I disagreed with this but then the House made it worse by changing 10 years to only 3 years. This is a really bad idea as these people have already show they will avoid having insurance. One of the key reasons our current mandatory auto insurance law does not require proof of insurance at the time of vehicle registration was this requirement in the financial responsibility act. Making it weaker is just asking for even more violation of the law than we already have. If we had proof of insurance requirement at time of registration this might not be as bad but we do not. Please do not make things worse by greatly reducing enforcement of what requirements we do have. Thank you for your consideration of my comments.

Please remove Section 14 or at least restore the original 10 year requirement.
