Subject: CS for SB 130 testimony

My comments:

- Changing oil taxes again sends the wrong message to investors around the world that Alaska is not friendly to a stable business environment
- Increasing taxes on the businesses that are already suffering losses due to low commodity prices, just makes the situation worse, and will accelerate TAPS decline, the lifeblood of the State
- Smart tax credits will encourage risk taking, and help with the economic future of the State

Thanks,

Greg Sanders
