Subject: SB 156 Testimony Letter

Committee Members,

My name is Brittany Lauper, I live in Anchorage. I am writing to have my voice be heard and that I fully support the proposed Senate Bill 156 to protect our God given rights to bodily autonomy.

In 2013, at age 27, I was diagnosed with a genetic disorder called Lynch Syndrome which causes my genes to mutate and attack my body which caused me to develop Colorectal cancer - and by God's grace I was able to be healed from that. Lynch Syndrome also gives me a much higher possibility of developing other cancers and unfortunately I haven't been unable to get my yearly preventative exams due to the ridiculous requirements of the Doctor's offices & Surgery Centers, like being forced to suffocate myself with a mask and swabbing my nose with toxic chemicals. Not to mention, I'm terrified of anything happening during an exam that could put me in the hospital. I've seen what is happening and how they treat people these past 2 years. My Great Physician is The Lord - and I would rather Him take me than to go through what they're being incentivized to do to un-inoculated people in the hospital.

The mRNA gene editing technology that these injections use affects the DNA & genes of the person receiving it - and I will not risk testing them on my body for any reason. There is no transparency, no informed consent and when we ask questions, we are demonized. Even if these weren't experimental, I still would not test them on my body. That is my decision and my God given and constitutional right to make medical choices for myself.

In December, I finally met with my surgery doctor (whom I had previously respected greatly, & had a wonderful relationship with) to see if she would be willing to sign a medical exemption. Although I have a religious exemption prepared to turn in as well (I have not been forced to turn into my employer yet) I felt I qualified for both. After sitting down with her going through all my questions & notes I brought with me, all she could say was "it's safe and effective"... No elaboration on how it could affect someone with Lynch Syndrome and DNA disorder. When I respectfully asked her "is this your medical opinion that it's safe for me and my personal medical history? Or is this your personal ethical opinion because you think I should get it?" And she said it's her personal ethical opinion and she believes everyone should get it... then adding "You could probably find an anti-vax doctor in town that would sign your medical exemption." This, to me, is medical malpractice.

The audacity of a government thinking they can force something into my body and implement a blanket mandate over every human with NO regard to personal medical circumstances or religious beliefs is not only unconstitutional, but an egregious human rights violation. Additionally, to require us to jump through stressful, time consuming & financially costly hoops to get a medical or religious exemption - that has been shown to likely be denied by most employers - only to put us on some kind of list to keep track of those who's exemptions are accepted makes me feel like less of a human. The stress and anxiety caused from the threats of losing our ability to make an income is not to be downplayed either. This is NOT about my health. This is NOT about my safety.

This is about the federal government being able to persecute us and control our lives - indefinitely. This is not right... Something very, very bad is happening here.

This medical experiment they are coercing many confused & fearful people to a part of is nothing less than criminal. I know you have seen the unbelievable numbers of deaths and injuries caused by this experimental injection. I do not understand how anyone is still pretending like this is any kind of cure for getting back to our normal free lives. Anyone who is injected can get the illness and spread it. Anyone who has eyes can see very clearly they will never let up on their tyranny - unless we refuse it.

It is YOUR DUTY to secure & protect our rights. Emergency power is NOT a governing power in our state. This is a dictatorship slapping us in the face and laughing. We need to hear more of our state leaders boldly taking a stand and speaking up about the dangers of this shot. If we the "little people" are aware of the data - you must be aware too. Being willfully ignorant will not be acceptable when this is exposed for what it is. I will not accept this as "safe and effective". It is a lie. There is no evidence this is safe OR effective. There are no successful safety studies. It is dangerous and it is killing people. This injection is the most toxic in US history - and it's only been 1 year - and our lives are being threatened with it. We will hold accountable anyone pushing this or not fighting against this. You are our Representatives for the main purpose of keeping our inalienable rights safe & sacred.

Liberty is not dead; it is a living, vibrant, powerful force and it will not be taken from me.

So, I support this Bill and I ONLY support our elected leaders that uphold their oath to protect our sovereignty of choice.

Thank you for your time.

Brittany Lauper

Subject: PLEASE set hearing for SB 156

Chair Wilson and Vice Chair Hughes;

I am writing to request you please set a hearing for SB-156. No one should be fired or refused employment because of their choice to choose medical freedom and bodily autonomy over fear and coercion.

Please protect our rights of choice and medical freedom.

Citizens are being coerced to choose treatments inappropriate for them based on their personal medical history and beliefs.

The following is my personal experience with this current injustice.:

I was employed from 6/29/2015 to 9/10/2021 (over 6 years) with Chugach Training & Educational Services LLC at Alaska Job Corps in Palmer as a Medical Record Clerk in the Wellness Clinic.

(This included working from home 2 days a week for several months during the 2020 COVID restrictions period 4/2020-11/2020 - all staff was tested before our staff and students were allowed to begin to return to Center.)

About 3 PM on Friday 8/27/2021, a user wide email was sent from our Center Director informing us that due to the Biden issued COVID vaccination mandate, as of 9/01/2021 all employees were required to show verification of COVID-19 vaccination or to complete & show verification of negative COVID-19 tests 3 times a week to have access to the Alaska Job Corps Center to continue working.

Due to religious and health reasons, I do not wish to risk taking the vaccine, and feel that is is discriminatory to request only unvaccinated persons to test, as vaccinated persons can still contract and spread the virus.

I expressed my concerns and beliefs to my Center Director who indicated the order was issued due to the Federal mandate.

I worked the following Monday 8/30 & Tuesday 8/31 and submitted my remaining leave time through 9/10/2021 in hopes of a change in policy. (I had already entered leave for Friday 9/3 for an extended 4 day Labor Day weekend).

on 9/13/2021 Monday, I spoke to HR and informed her I would need to turn in my keys and ID if policy had not changed. I was asked to write a letter of resignation. I indicated I was not resigning, but being forced to find employment elsewhere to earn income to survive since they were not allowing me on Center to work and wrote a letter to that effect upon submitting my keys & ID.

I applied for state unemployment benefits on 9/14/2021 online and have been continuing to file weekly claims and submitting required job searches.

I received a phone call from AKUIB for details of my employment separation and was highly offended to be subjected to having to justify my personal and medical reasons for my decision.

On 10/17/2021 I received a letter in my PO box postmarked 10/14/2021 (letter dated 10/13/2021) from UI Claim Center. The UI Claim Center letter indicated they determined that I did not establish good cause for voluntarily leaving my work & therefore denied benefits from application until 10/23/2021 as well as having my maximum payable benefits reduced by 3 times my weekly benefit amount.

I did not receive ANY UIB benefits until 12/3, have been seeking new employment, and NOT as of yet received a hearing date for my appeal.

As a 62 year old voting taxpayer who has worked since I was 12 years old, I am astonished at the injustice I am receiving.

Thank-you for your time & consideration.

Subject: No mandatory vaccinations

Dear Senators

I am writing asking for your support and voting to pass Senate Bill 156 which would make all vaccine mandates and immunity passports unlawful in the state of Alaska.

No one should be forced by our government to take a vaccine to keep a job or to be able to attend school.

People have many sincere and legitimate reasons for not wanting to be vaccinated including medical and religious reasons. There have been over 10,000 deaths in our country attributed to vaccine adverse reactions and many people don't believe it's worth the risk to prevent a virus that has a 99.5 recovery rate. All Alaskans should have this right to make their own personal health decisions!

Thank you so much and looking forward hopefully to this bill passing and giving all Alaskans the ability to determine their own destinies without government interference.

Sincerely,
Murry Keith

Douglas, AK

Subject: I support HB 156

Senate State Affairs Committee:

Alaska should set the example for America and the world as the place where the right to life is protected and celebrated from conception to natural end of life. That right to life includes the freedom and liberty to live without coercion from employers, schools, the healthcare establishment, and the government.

I support SB 156 and the prohibition of vaccine mandates and the requirement to share any of my private healthcare information.

I urge you to vote in favor of protecting my life, liberty, private healthcare information, and vaccine status. Vote yes on SB 156 today.

Dear Senator Kawasaki,

Appreciate the response, you are the 1st respondent and can be congratulated for at minimum acknowledging my and many others Alaskans concerns. The Canadian Issue is really simple, Canada and Alaskan Companies will either choose a path of Commerce and rectify the issue or we let the free market open up further and let competition develop more cost effective means to bypass Canada in its entirety. Canadian Politics or its concerns have no place in America.

My company would consider opening a new shipping company which would totally bypass Canada while Canadians figure out their identity and economic issues. Imagine several brand new ports in the lower 48 as well as in Alaska State creating thousands of new jobs, increasing economic progress, and reducing Canadian dependency. Imagine more Cargo Airlines and other creative transport methods, the economic possibilities are endless.

Support the bill Sir, Support American Freedom, and encourage the legislature to let go of fear. The data is in we have all survived, we all will survive, so let the American Economic System Thrive.

Respectfully,

Jesse L. Thacker

Subject: RE: Support For Senate Bill 156, Sponsored by Sen. Lora Reinbold (R-Eagle River)

Jesse... thanks for reaching out in regard to SB156, relating to a prohibition on COVID-19 vaccination discrimination. I have received many personal emails regarding this issue and the Senate State Affairs Committee heard testimony from many across the state. It's clear there is a lot of interest in this bill.

As this bill moves through the legislative process, I look forward to hearing all the different arguments surrounding this bill which includes your testimony. I agree that the freedom of choice and the right to privacy are integral to Alaskan's lifestyle, so much so that the right to privacy is written into our State Constitution (Article 1 Section 22). SB 156 tries to balance the previously mentioned right to privacy with the Legislature's obligation to promote public health as written in our State Constitution (Article 7 Section 4). One thing this bill does not do is deal with the vaccination requirements to get into Canada, which is something that many folks are concerned about.

Thanks again for voicing your support of SB 156 and please feel free to reach out at any time if I may be of service to you in the future...sjk

Attention Alaska State Legislature,

It has come to my attention that [Senate Bill 156](#), Sponsored by Sen. Lora Reinbold (R-Eagle River) is introduced into the Alaska State Legislature. This bill will help protect Alaskan Citizens right to make personal health choices for themselves and their loved ones. I support Alaskans right to choose their own health care. I also do not wish to be pressured by outside lobbyists, especially those of pharmaceutical company's, nor State Governments Agencies in mandating injection or ingestion of any drugs into my body or my family members. I implore you to support Senate Bill 156 and keep Alaskan's Free to make personal health care choices thus also supporting our freedoms and right to medical privacy. I am a voter and I do vote regularly. I have lived in Alaska over 30 years and shared this with everyone which is a lot of people.

Please let me know if you intend on supporting this bill or not.

Respectfully,

Jesse Thacker

BILL: SB 156

SPONSER: Senator Reinbold

DATE & TIME: 02/10/2022 @3:30 PM

My name is DENNY KAY WEATHERS, I live on Hawkins Island in Prince William Sound. For the record I **Strongly Support** SB 156.

I was so thrilled to see Senate Bill 156, I really commend Senator Reinbold for standing up for those of us that do not have a voice anymore.

The first time I heard about Corona virus was in the late 60's early 70's and all mothers were spraying Lysol because coronavirus was listed as one of the germs it would kill and I was told it was just one of those flu bugs. No big deal, right? Or was it just the beginning.

The history of corona virus has been around since 1931 as an animal virus but in the 1960's **the United States and the United Kingdom** started **cultivated the virus** by passing it through organ culture of human embryonic trachea and that began the human corona virus, then they began inoculating volunteers. They then isolated and grew the virus in a kidney tissue culture, designating it 229E and the corona virus (even though it was a mild cold/flu bug) was on its way to destroying the world.

As they cultivated new different stains (i.e. SAR-CoV-1, MERS-Cov and SARS-CoV-2 which is the source of the COVID-19 pandemic) funny how all the above new known coronaviruses that infect humans appear to originate in bats. (Most likely cultivated in a petri dish for our enjoyment).

Did the British really give Small Pox infected blankets to the Plains Indians? How often does our own government conduct tests on humans unbeknownst to us? (Please see email attachment for top 10 test on unknowing Americans that they were caught doing)

Yes, our own government helped create this deadly virus and now you want us to trust their created vaccine? My youngest son who was born healthy had to spend a year in and out of the Seattle's Children's Hospital after his three month immunization, I can't remember how many times he was revived. NO I DO NOT TRUST GOVERNMENT VACCINES for a good reason.

As for all the other mandates; all they have done is destroy America as well as the rest of the world. Other countries are dropping the mandates and other States are dropping their mandates (see email attached copies of news articles) let's start dropping Alaska's mandates and try to recover our economy before it is too late.

DENNY KAY WEATHERS

Subject: Alaska Senate Bill 156

Senators-

I am writing to you to respectfully request your support of Alaska Senate Bill 156. As you are aware, this bill prevents:

- Discrimination based on “vaccine” status
- Questioning exemptions or requiring further documentation
- “Vaccine” passports
- Negative test passports

Our rights have been violated for far too long by draconian measures. The vaccines do not work. Once vaccinated (and boosted) you can still get/transmit/die from covid. In addition, the “vaccines” are EUA (Emergency Use Authorization Only, and are not “approved” by the FDA as Big Pharma and MSM would have you believe.

The long term side effects of these “vaccines” are not known. For example, what effects do they have on:

- The blood supply?
- Organ donation?
- Genetics?
- Fertility?
- The general health and well-being of those who receive them?

There is too much evidence out there that suggests that the “cure” is worse than the disease. The mortality rate is too low to justify such grave measures.

Please consider support of this all important bill.

Thank you,

George_Silowash

Subject: Discrimination based on vaccine status

ACTION ITEM: Help Prevent Discrimination in Alaska

Alaska Senate Bill 156 prevents:

- ◆ Discrimination based on vaccine status
- ◆ Questioning exemptions or requiring further documentation
- ◆ Vaccine passports
- ◆ Negative Test Passports

These Alaska Senate 'Republicans' are staunchly against vaccine choice. They voted to tank all anti discrimination laws last session.

Many cited that it was not the role of government to impose on business owner rights...except they do that in every way. OSHA, Civil rights, ADA, health dept,, department of safety, licensing boards, compulsory bonding, taxes, conditions of state funding etc. This law clarifies existing laws under title 7 and ADA. It is almost exactly what Montana state put in place.

What is your reasoning for supporting discrimination and segregation and defend their weak argument against regulating business.

Remember that it is medical consensus that these vaccines do not stop transmission, equal transmission found between vax and unvaxxed and do not stop infection in the vaccinated. The science doesn't support that unvaccinated are a danger to anyone.

■ Studies on viral load and transmission between vaccinated and unvaccinated:

See these studies for more information:

Subject: Alaska SB 156 

Dear Senators,

Thank you for moving this legislation to committee to review!

The mRNA shots are genetic modification only: they do not reduce transmission, they do not reduce infection rates, and they do not reduce death.

These are the things a genuine vaccine is supposed to do. These shots are NOT "vaccines", they are spike protein injections: i.e., bioweapons.

Neither "safe" nor "effective", they are responsible for (1) all the COVID hospitalizations currently; (2) all the "variants"; and (3) 95% of all new COVID deaths.

Not only should you not MANDATE these injections, you should OUTLAW them!

These shots should be CRIMINALIZED.

And while you're drafting the legislation, add direct penalties to persons who violate the law. Right now there are no penalties and there are many people willing to violate discrimination laws now with no fear of reprisal.

Thank you and God bless you!

Senator,

I am writing to you to respectfully request your support of Alaska Senate Bill 156. As you are aware, this bill prevents:

- Discrimination based on “vaccine” status
- Questioning exemptions or requiring further documentation
- “Vaccine” passports
- Negative test passports

Our rights have been violated for far too long by draconian measures. The vaccines do not work. Once vaccinated (and boosted) you can still get/transmit/die from covid. In addition, the “vaccines” are EUA (Emergency Use Authorization Only, and are not “approved” by the FDA as Big Pharma and MSM would have you believe.

The long term side effects of these “vaccines” are not known. For example, what effects do they have on:

- The blood supply?
- Organ donation?
- Genetics?
- Fertility?
- The general health and well-being of those who receive them?

There is too much evidence out there that suggests that the “cure” is worse than the disease. The mortality rate is too low to justify such grave measures.

Thank you,

Jim Richardson

Subject: Please Support SB156

Please support SB156 and allow us to make our own decisions about Covid-19 vaccines. Please protect medical freedom in Alaska.

COVID-19 vaccine mandates violate the rights of Alaskans. There are many reasons for declining a vaccination, including; personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market COVID vaccines. No Alaskan should be coerced when it comes to their health and the health of their children. NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept a vaccine. There is already an ongoing shortage of healthcare and other workers due to these mandates. Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination just like other medications.

I oppose any forcing of someone to accept a COVID-19 vaccination out of fear that they will no longer be able to work, travel, go to school, or enjoy other cherished American freedoms if they say NO or decide to wait.

Thank you,

Subject: In Support of SB156

Hello Senator Wilson,

I am writing to ask you to please support SB156 to prohibit vaccine discrimination. It has been wildly frustrating to see government effort compel and coerce our population to receive vaccines still under EUA, or other vaccines that are new to market and have not been through the vetting that normally accompanies such activities.

EVEN IF this were a long-standing vaccine with an impeccable track record, I would still ask you to support the bill to prohibit vaccine discrimination as there are valid reasons that someone may not be able or interested in such a procedure and I am highly committed to protecting those who may be unable/unwilling to pursue vaccines.

Thank you for standing in support of SB156.

Warm regards,

Hi Senator Wilson,

I'm writing you in support of SB156, in that this is a timely bill to keep our state from embarking in medical discrimination for an emergency use authorized injection. A person is not denied state services for any other vaccine or medical condition - they should not be denied for lack of obtaining a covid-19 shot either.

I have friends and family who have had moderate to severe adverse reactions to approved vaccines, let alone one that has not had the long-standing studies that prove safety and effectiveness. These decisions should be left to the individual, who knows their body best, and to their trusted personal medical professionals, who have their best interests in mind - not to anyone else.

Thank you for your consideration,
~Heather Bennett

Subject: SB 156 public testimony

Good morning

I hear that you're going to be taking testimony for SB156 on March 1st. Unfortunately I'll be flying that day to Spokane Washington.

I'd like to submit my testimony by email instead.

Please support this bill.

It's critical that we have freedom to choose what to put inside our own bodies because so many people like me and my children and grandchild are very sensitive to shots and in my immediate and extended family, we've had violent reactions to shots including life threatening responses.

Covid shots specifically have been shown to have the highest rate of side effects and death then all the other shots combined.

Another reason is if we don't guard our personal freedoms now when it comes to our bodies, then how can we expect our children or grandchildren to have any freedoms at all. And also, in their day, what if the govt says that certain people need to be sterilized or take some other drug, "for the good of the community". What's to stop this from escalating and becoming more regulations over our health in the future?

I could actually write a book as to why I don't support forced shots or any forced invasive medical treatment inflicted on us. I hope you will see the ramifications of allowing this intrusion to proceed any further.

Please support SB 156

Thank you so much and have a great day

Subject: Bill SB 156

Hello,

I am writing to give my full support in favor of Bill 156 to protect liberty, parental rights and medical choices. My husband and I are residents of Sitka and have been absolutely appalled at the overreach of power we have seen enacted by our Assembly members during the pandemic period of time.

One member in particular, Thor Christianson, even went so far as to declare that all unvaccinated people should be lined up and shot. This was said in front of witnesses on more than one occasion. Mr, Christianson is also the person in town that teaches CPR-how ironic that someone who makes a living teaching life saving services in reality actually wishes people dead...

We have seen the abuse of people who choose to remain free of the experimental gene therapy during the last 2 years by our one and only choice for medical services, SEARHC.

Lastly, the newspaper in our town, The Sentinel, insists on printing front page articles pointedly blaming the entire pandemic on "the unvaccinated"

I appreciate this bill and those who have worked hard to bring it to this point. I fully support any efforts towards the freedom to choose.

Thank you,

Kris Chinalski

Subject: SB-156 (anti discrimination bill)

To Whom It May Concern,

As the experimental covid vaccines are now into their second year of world wide human trials it's become established beyond doubt, and well reported in the science literature with admissions this is so by various health governing bodies around the world, that they do NOT stop transmission of the virus ... nor do they prevent those vaccinated from getting infected.

This alone should make the passage of this bill a no brainer.

Beyond that ... it's also now **beyond clear** that there are **very effective** prophylactics available that can easily treat those who develop symptoms keeping them from any serious complications and hospitalization .. especially when caught early.

In other words ... the pandemic **crisis** is over .. there is NO EMERGENCY under which such extreme measures can any longer be justified.

Please do the **obvious** and **scientifically RIGHT THING** and pass this bill.

thank you
Bill Teague

Please support medical rights and freedoms.
These shots are not safe or effective.

Speaking from my own experience and the experiences of my friends and family, more vaccinated people I know caught and spread Covid than unvaccinated. Unvaxxed showed no worse symptoms or severity or length of illness.

I have seen many people with short term and long term side effects from this Covid 19 vaccination injection experiment. I know of single double and triple vaxxed people that have died from Covid and Covid related illness.

Government or private business can NOT mandate an experimental life altering (continual)shot or ANY shot ever. Nor can they mandate tests for well people. Look at the Nuremberg code and trials. These current discriminatory acts are crimes against humanity.

You must support this bill to stop any discrimination based on the gene therapy shot named the Covid 19 vaccine. It is ineffective and dangerous.

I have included a link to a video with the released data they have so far on the pre-trial studies done for these so called vaccinations.

Subject: Support For Senate Bill 156, Sponsored by Sen. Lora Reinbold (R-Eagle River)

Attention Alaska State Legislature,

It has come to my attention that Senate Bill 156 <<https://www.akleg.gov/basis/Bill/Detail/32?Root=sb156>>, Sponsored by Sen. Lora Reinbold (R-Eagle River) is introduced into the Alaska State Legislature. This bill will help more clearly define Alaskan Citizens **pre-existing rights** to make personal health choices for themselves and their loved ones. Actions over the last 2 years make this bill essential to support US and Alaskan Citizens inherent freedoms.

The Federal Government, Some State of Alaska Agencies and Personnel, Alaskan Cities, and many business corporations took and continue to take actions in the name of public health which have severely degraded citizens civil liberties by closing business, (The government determined which business were essential), barring access to services, barring free travel, cancelling effective education, and much more without long term safety data consideration.

Alaska Citizens Rights.

Alaska State Constitution:

Article I – Declaration of Rights

§ 1. Inherent Rights

This constitution is dedicated to the principles that all persons have a natural right to life, liberty, the pursuit of happiness, and the enjoyment of the rewards of their own industry; that all persons are equal and entitled to equal rights, opportunities, and protection under the law; and that all persons have corresponding obligations to the people and to the State.

§ 15. Prohibited State Action

No bill of attainder or ex post facto law shall be passed. No law impairing the obligation of contracts, and no law making any irrevocable grant of special privileges or immunities shall be passed. No conviction shall work corruption of blood or forfeiture of estate. **(Personal Note)** - You can not make a law or mandate which punishes people for not taking experimental medical procedures.

Below are just a few of the thousands of emerging negative results from Federal and State Mandating of Personal Health Choices. Just cut and paste in your browser of choice.

COVID Injection Emerging Health Data:

REUTERS: COVID Vaccine Injury Claims Mount, but recourse lacking for those harmed.

<https://www.reuters.com/legal/government/covid-vaccine-injury-claims-mount-recourse-is-lacking-those-harmed-2021-10-19/>

Subject: Support SB 156 to prohibit discrimination

The Honorable Senator David Wilson,

I write you today to urge you to support the passing of SB156 to prohibit any discrimination against anybody at any time in regards to their vaccination status. Currently this addresses the Covid19 situation but should also address any future situations of similar nature.

It should be unlawful to discriminate against whether that pertains to employment, job application, entry into any establishment, or for educational opportunities.

Also, the issue of immune passports should be discouraged as it creates the possible discrimination that this bill is trying avert.

We do not want to separate and further discriminate our population here in Alaska. We need to come together when we encounter pandemics like this.

I very much appreciate your support on this bill and as a local Juneau chiropractor I have never asked any of my patients whether they have chosen to get jabbed or whether I will see them as patients due to their decision. None of my business. It should be a personal choice and nobody should tell you what to do with your body.

Sincerely,

Birger Baastrup, D.C.
