Senate Bill 174 Oil and Gas Industry Job Notifications

Sectional Analysis

Section 1 provides that oil and gas producers which employ more than 100 employees in Alaska notify the Commissioner of the Alaska Department of Labor of available job opportunities. The Department is then required to make those job recruitment notices of job publicly available. Exceptions are made for companies already advertising under other provisions of law or if public notice would cause financial harm to the employer.

Section 2 provides that the Employment and Placement Committee of the Alaska Workforce Investment Board assist in making state residents aware of oil and gas job recruitment notices.

Section 3 provides for posting of job opportunities using the Alaska Online Public Notice System.
