In regards to House Bill 185

As an Alaskan, I am pleased to request your support in favor of passing House Bill 185. As an employee for Slayden Plumbing and Heating, this legislation is important to the continued vitality of our crew. We have completed numerous successful projects across this great state, including but certainly not limited to: Ft. Richardson and Wainwright, Elemendorf and Eielson air force bases, FAA projects in Cold Bay, King Salmon and Bethel, numerous housing projects throughout the state and countless private projects.

At Slayden Plumbing and Heating we participate in Merit Shop contracting and strive to be the best on any job site. We've witnessed PLA attempts in Anchorage and Fairbanks locations lately and are concerned for our livelihood if this continues.

One primary concern with PLAs is that many employees, especially in more rural communities, will not be employed long enough to fully vest in a union; forfeiting their dues and wages paid in during their tenure. They may also be passed over for a job or not dispatched due to seniority rankings and location. In these insecure economic times, we need legislators making decisions that promote economic growth, not limit it.

Furthermore, as the Last Frontier, we Alaskans continue to pride ourselves on clear values: hard work, a drive to achieve, and a belief in the American capitalist system. Project Labor Agreements interfere with employees individual rights to negotiate with their employers and obtain the best possible work arrangements.

I would appreciate your support for the "Government Neutrality in Contracting Act"

Sincerely,

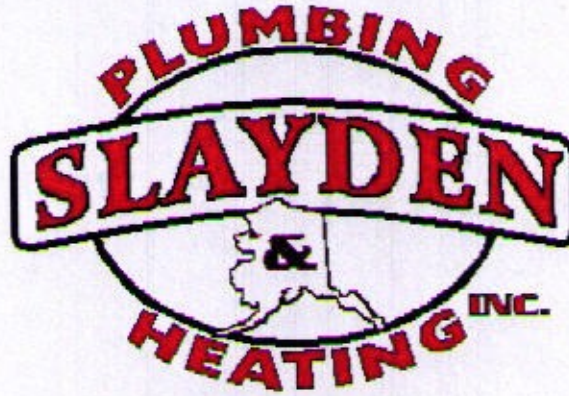

William S. Estes
