Part-time						
Temporary						

ANALYSIS: (Attach a separate page if necessary)

Senate CS for CSHB 280 offers tax credits for Cook Inlet gas storage facilities and provides a 40 percent production tax credits intended to promote gas exploration and production in the Cook Inlet.

There is no anticipated fiscal impact to the Division of Oil and Gas for the management of gas storage on state land. However, Sec 3 of the bill will provide a ten year "holiday" on all storage fees and rentals for the storage lease. Also, the accounting convention described in this section means that "non-native" gas will be withdrawn from storage first and no royalty revenue will accrue to "native" gas until all non-native gas is withdrawn. How industry will respond to the tax credits offered by this bill is unknown, therefore, the impact on fees, rents, and royalty revenues is indeterminate.
