FISCAL NOTE #1

STATE OF ALASKA 2011 LEGISLATIVE SESSION

BILL	NO.	SB	44
-------------	-----	----	----

Analysis

This bill adds 23,181 acres to the southeast State Forest in Southern Southeast Alaska by redsignating certain state-owned parcels. A timber management plan would be developed to actively manage the parcels for higher timber volumes per acre, shorter rotations, and less impact on wildlife. Designation of these parcels as State Forest lands and the development of a timber management plan will allow for long-term management activities, including the thinning of young second-growth timber stands, generally not considered appropriate for undesignated state lands.
Implementation of this bill will not require new positions or funding.
The bill will have no short-term impact to the revenue stream, but will provide for long-term increases in forest productivity and subsequent increased timber revenues.
