FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB365

Analysis

This is a zero fiscal note.

This bill would require an unspecified department (presumably the Alaska Department of Fish and Game) to establish a rapid response and management plan for addressing occurrences of aquatic invasive species in limited geographic areas of Alaska. Development of this plan would need to be done in cooperation with other state agencies. For Health and Social Services, this bill would allow a forum to discuss and respond to invasive aquatic species with a direct impact on human health. An example of such a species could be a novel mosquito (which spends part of its life in freshwater) to Alaska that is capable of transmitting diseases (e.g., West Nile virus) not previously experienced locally in the state. There might also be indirect impacts to human health. An example of this may be the introduction of a new predatory fish species that could affect local fish stocks and impact food stability or may contain differing levels of harmful contaminants in the flesh (e.g., mercury in Northern pike). Either situation could ultimately impact human health and would require a multi-agency response, given jurisdictions and expertise. Based on the past work of a similar Council and other related issues (e.g., rat eradication), the department would likely not play a primary role but would be available to provide relevant input as needed. The department anticipates that the involvement in the rapid response and management plan would be accomplished with existing resources and would result in no fiscal impact.
