OPPOSE HB 20

I am a resident of Kenai and have observed the evolution of the Personal Use Fishery from the "temporary biologically necessary" measure that it was in 1989 because of the closure of the inlet due to the Exxon Valdez Oil Spill to the uncontrolled mania that it is now.

This measure—seeking a Resident Personal Use Priority above all other user groups is the EPITOME OF THE ENTITLEMENT MENTALITY.

All user groups bear the same responsibility and obligation to support the ADF&G in achieving the Escapement Goals to assure the future sustainability of the fishery.

This measure has rightfully been defeated repeatedly in the past and should be again.

I urge you to OPPOSE HB 20.

Ted Crookston
Kenai, AK
