¹ Middle projection series

Source: Alaska Department of Labor and Workforce Development, Research and Analysis Section

through migration is projected to continue through 2034.

The Department of Labor projects stable growth for the Native population through the projection period, from 125,200 people in 2009 to 171,660 in 2034. (See Exhibits 6 and 11.) Additionally, Natives are expected to increase as a share of the state's population, from 18.1 percent in 2009 to 19.9 percent in 2034.

Historical trends for natural increase and interstate net-migration have been relatively stable, so uncertainty estimates were unnecessary for this group. Therefore, the Alaska Native projections are only comparable to the middle series of the statewide projections and can be subtracted from this series to estimate the non-Native population.

Average

Decreasing fertility rates are reflected in the Native share of the total population under age 20. That proportion is projected to decline over the period from 22.4 percent in 2009 to 21.9 percent in 2034. The median age for the population is expected to rise from 25.8 to 29.8 between 2009 and 2034.
