FISCAL NOTE

STATE OF ALASKA 2012 LEGISLATIVE SESSION

В	IL	L	NO.	SB169

Analysis

This bill adds an additional funding factor into the Public School Funding (Foundation) formula .

The factor provides funding for eligible high school students that are enrolled in eligible distance delivery courses which are provided through an accredited public postsecondary institution located in the state.

The bill provides additional funding of .50 base student allocation (.50 * \$5.680 = \$2,840 for fiscal year 2013) when a student enrolls in one or more distance delivery courses if:

the course is part of the core academic curriculum required for eligibility for a scholarship under AS 14.43.820 (Alaska Performance Scholarship;)

the district provides the course to the student only by distance delivery; and

an accredited public postsecondary institution located in the state provides the course.

Based on the bill language the possible enrollment is unknown. The language does not limit eligible students beyond those in grades 9 - 12, enrolled in a course necessary for the scholarship at 14.43.820, where the district provides the course to the student only by distance delivery, and the course is provided by an accredited public postsecondary institution in the state.

Section 1 of this bill amends the foundation formula to generate funding based on counting those students enrolled in eligible courses. The formula would apply a factor of .50 to the eligible distance delivery enrollment and then multiply by the base student allocation (BSA) of \$5,680. One student participating in this program would generate \$2,840 in funding in FY2013.

Section 2 provides eligibility as follows:

the course must be a part of the core academic curriculum as outlined in the scholarship program under AS 14.43.820.

the district provides the course to the student only by distance delivery; and

an accredited public postsecondary institution located in the state provides the course.
