Subject: support 189

As an Alaskan who supports a strong home building industry, please support passage of Senate Bill 189.

Alaskans should be free to build their own homes. But the law to allow owner-builders should not be abused in order to allow unscrupulous contractors to run a business without the proper licensing, insurance, and bonding.

SB189 is an effort to protect the freedom of Alaskans to building their home while weeding out the bad actors who abuse the law.

Thank you,

John Richard Carr
