FISCAL NOTE ANALYSIS

STATE OF ALASKA
2014 LEGISLATIVE SESSION

BILL NO. HB 366

Analysis

This bill would allow the Department of Public Safety (DPS) to receive from the Alaska Court System and the Department of Health and Social Services certain records related to involuntary commitments and adjudications of mental illness or mental incompetence and subsequently transmit those records to the FBI for inclusion in the National Instant Criminal Background Check System (NICS).

The NICS is a national system that checks available records in three databases to determine if prospective firearm buyers are disqualified from receiving firearms. A NICS check includes a check of the following three databases that are maintained by the FBI:

- Interstate Identification Index (III or "Triple I"), a database on criminal history record information;
- National Crime Information Center (NCIC) which includes information on persons subject to civil protection orders and arrest warrants; and
- NICS Index which includes the information contributed by federal and state agencies identifying persons prohibited from possessing firearms who are not included in the III or NCIC, such as persons with a prohibiting mental health history.

When information about involuntary commitments and adjudications of mental illness or mental incompetence is provided to the NICS, the FBI can deny firearm transfers to persons with disqualifying mental health histories both in the state where the record was created and in other states to which the person may have subsequently moved.

The records DPS would receive under this bill would be maintained in a separate database. This would further protect the confidentiality of the records and ensure they would only be available for the purposes outlined in the bill.

This fiscal note includes software development and programming costs necessary to: create a separate repository for records related to involuntary commitments and adjudications of mental illness or mental incompetence; safeguard access to them; allow semi-automated submission of records; allow modification or withdrawal of submitted records; and allow audits and reporting against the new database.

The estimated costs are based on 232 hours of contracted programming costs at \$105 per hour.
