FISCAL NOTE ANALYSIS

STATE OF ALASKA 2014 LEGISLATIVE SESSION

BILL NO. SB211

Analysis

SB 211 confers upon the Department of Transportation & Public Facilities (DOT&PF) rather than the Department of Natural Resources (DNR) the primary authority to manage the surface estate of land and property interests acquired or held by the state for airports, highways and public facilities.

The bill clarifies that DNR retains existing authority to administer its authorities and responsibilities under relevant statutes to administer the state program for the conservation and development of natural resources, subject to terms and conditions required by DOT&PF that are applicable to the proposed use of the surface estate.

DOT&PF will have to file with DNR a written determination and preliminary property plans identifying the portion of the public domain or interest therein that DOT&PF finds necessary for airports, highways and public facilities, or as a material source for the construction or maintenance of airports, highways and public facilities. DNR would then be required to transfer fee title to the surface estate, subject to valid existing rights, to DOT&PF within four months from the request to DNR. The section specifies that transfer is not a disposal of state land and presumed to be in the public interest and therefore DNR will not be required to issue decision under AS 38.05.035 or public notice under AS 38.05.945. DNR would retain its ability under its statutory authorities to issue authorizations on, and manage some interests on, lands conveyed to DOTPF.

The bill also gives DOT&PF the authority to sell or otherwise dispose of lands held by DOT&PF by sale, lease, vacation or exchange when it determines the lands are no longer necessary to its needs. The bill gives DOT&PF authority to transfer the lands to DNR for state management or disposal.

DNR may not charge DOT&PF for material, set time limitations, or otherwise restrict DOT&PF from access to material sources and sites owned by the state.

This bill stipulates that the surface estate to the access roads, camps, and airstrips at Franklin Bluffs and Happy Valley on the James Dalton Highway are transferred by DNR to DOT&PF. The bill stipulates that the transfer of those properties to DOT&PF does not affect or otherwise alter current licenses and permits issued by the DNR for use of those properties. The bill further stipulates that after January 1, 2015, the DOT&PF shall accept and begin to process permit and license applications through its rural airport permitting program for an activity currently authorized by permit or license by the DNR and normally permitted through rural airport permitting authorities.

Lastly, the bill authorizes the commissioner of DNR to determine the length of term of the easements granted to the USFS for longer than 55 years if determined to be in the best interest of the state. It also states that easements over submerged lands shown on map 92337 as part of the reciprocal exchange of rights of way in federal law 119 Stat. 117 are granted to the USFS.

DNR believes that the requirements of this bill can be accommodated under the state's existing budget allocations.
