Date: 12/05/13

FISCAL NOTE ANALYSIS

STATE OF ALASKA
2014 LEGISLATIVE SESSION

BILL NO. SB028

Analysis

This bill would establish a new State Forest and broaden the options for negotiated timber sales on state land. Implementation of this bill will not require new positions or funding. The Division of Forestry currently already manages land classified for forestry use by regional area plans and the division has an active timber management program in place.

The bill will have no short-term impact to the revenue stream, but will provide for long-term increases in forest productivity and subsequent increased timber revenues.

I. Susitna State Forest

This bill would establish the Susitna State Forest in the Matanuska and Susitna Valleys from state land presently classified for forestry management by the two area plans for the region. These lands are currently managed by the Department of Natural Resources (DNR) for timber harvest and other multiple uses. Legislative designation of these lands as a State Forest will ensure the long-term availability of a timber supply for local commercial and personal use, support economic opportunities for the region's communities, improve access to the parcels, and retain the land in state ownership for multiple uses. The State Forest will also support the growing interest in wood energy projects in local communities. These projects require a long-term, sustainable wood supply.

The proposed State Forest includes 33 parcels totalling approximately 763,200 acres in 14 large management blocks. The Susitna State Forest would become part of the State Forest system managed under AS 41.17.200-.230 and the Alaska Forest Resources and Practices Act (FRPA, AS 41.17) which is designed to protect fish habitat and water quality, and ensure reforestation. A state forest management plan would be prepared and adopted through a public process as required by AS 41.17.230.

II. Negotiated timber sales

This bill would expand the conditions under which the state could offer negotiated timber sales under AS 38.05.110 and .118. Under the existing statutes, DNR may not offer negotiated timber greater than 500 thousand board feet unless the sale area has high unemployment, underutilized manufacturing capacity, and an underutilized timber supply that will lose value due to insects, disease, fire, or conversion to nonforest uses. These criteria prohibit larger negotiated timber sales in many areas of the state that are actively managed for forestry, and where there is high demand for wood for timber products and biomass energy. This bill would allow DNR to offer negotiated sales statewide within the limits of the sustained yield supply, and subject to a best interest finding under AS 38.05.035.

While it is anticipated that for most timber sales, a competitive bid process will continue to be in the best interest of the state, this bill would enable DNR to better respond to the economic realities and variability in the forest sector.
