Subject: Alaska smokefree workplace

Dear Senator Micciche,

I have just started talking smoke free workplace with businesses and agencies in Cordova. I am impressed with the number of local businesses that have already chosen to go smoke free (2 bars, 4 businesses). There are also a great number of businesses that do not allow smoking, but they do not want to "go public", in part because they do not perceive support. I believe the State of Alaska legislature needs to set an example that will convey to the business community the importance of this health issue.
Thank you so much for supporting the silent majority.
Sincerely,
Barb Bunte

Juneau, AK 99801-1182

Dear Senator Micciche,

I am a constituent and a supporter of a statewide smoke-free law that protects workers from the dangers of secondhand smoke. It's important that HB 360 move as quickly as possible through the Health & Social Services Committee. I urge you and the other committee members to approve this important legislation without delay.

Having two parents die young of lung cancer because of smoking, their employers providing smoking opportunities at work, gives me too good of a view about the dangers of smoking in the workplace. We could claim ignorance. We didn't know then what we know now.

If I eat poorly or drink a beer in a public setting, I do not endanger the health of those who are around me. That is the difference between smoking and other behaviors. And currently, in about 1/2 the state, if I am an employee my choice has been made for me.

Clean air in Alaska has a nice ring to it. I think about half of the rest of the U.S.already has comprehensive smoke-free workplaces. It's time for us.

I trust you will be vigilant about statistics that will start popping up now that this legislation is being heard. When I was teaching English and kids were writing research papers I told them to "cite your sources so that I can check them out." And I did. Not surprisingly a few were "creative facts and statistics". That was only about a grade in a class. The tobacco industry spends millions in Alaska and they are trying for more than a good grade.

Thank you for your support. The HSS Committee is only the first step.
As the bill moves forward, your continued support will be greatly appreciated.

Sincerely,

Mr. Hal Smalley

Honorable Senator Peter Micciche, Honorable R
I'm writing concerning the e-cigarettes. My granddaughter is in high school and she said she is seeing her classmates using them. I'm concerned because the reports I'm hearing from the ANR states that there are carcinogens and harmful vapors in them. They are not being regulated enough because the FDA has not fully investigated them...yet. Until there is a clear statement from the FDA, I hope the bill goes on that ecigs be included in the smokefree workplace bill. Big Tobacco companies own these new products and from what we have seen with them lying about tobacco, can we expect them to be honest about these? I don't think so! I have also had other high school kids ask if they are safe. Please help curtail this issue. I'm also concerned because these youngsters will be entering the workforce this summer and be subjected to being around this unhealthy poisonious garbage! Concerned people need to set the standard and speak up for those who cannot!!!!!

It's important that HB 360 move as quickly as possible through the Health & Social Services Committee. I urge you and the other committee members to approve this important legislation without delay.

There is talk about exemptions for places selling tobacco. These are places where people bring their children, children who are even more susceptible to health risks of secondhand smoke.

And what about the surrounding businesses if tobacco sellers are adjoining other businesses? In Soldotna, one of the businesses where folks smoke permeate the other businesses who choose not to allow smoking.

Thank you for your careful consideration of this legislation that will save health, lives and ultimately $$$$ for the state of Alaska.

Thank you for your support. The HSS Committee is only the first step.
As the bill moves forward, your continued support will be greatly appreciated.

Subject: non smoking bill in Senate

I would like to support the measure to not allow smoking in public buildings including bars. As you may remember, representing the Veterans of Foreign Wars, I opposed this several years ago when Soldotna and Kenai were trying to adopt ordinances to this effect. I was opposed only because it was only in city limits. Customers of establishments in Soldotna and Kenai would have gone outside the towns so they could smoke, making it nearly impossible for the rest to survive. I would not have opposed the ordinance if it had been borough wide or state wide.
I am writing this as an individual and not as a member of the VFW.
Thank you for your consideration of this bill & hope you will agree with me on this one

I am in support for protecting workers from secondhand smoke and thank you for including e-cigarettes in the discussion (as we now know that not only is secondhand aerosol not simply a harmless water vapor, but they are also being used as illegal drug delivery devices using liquid marijuana and opiates).

I agree conceptually with protecting folks from the toxins in secondhand smoke and secondhand aerosol.

Thank you for all you do!!!

Subject: smoke free work environment

Dear Senator,
I am an Alaskan health care worker. I support all efforts and legislation that creates a smoke free work environment. It just makes plain sense to me to create clean air for people to breath when second hand smoke is proven to cause disease.
I find it apalling that other people might send you opposition letters to this, it is not their lungs in need of protection. They are not socially acceptable. Considering that they are willing to forfeit the health of others in the name of their own profiteering, it should be considered criminal. Healthy people should not be allowed to be harmed at the expense of a notion promoted by the pro smoking lobby. Second hand smoke infringes on the right of non smokers to breath normally unpolluted air.
Thanks for your consideration,
Cheers,
Andy McLaughlin- Community Health Practitioner (CHP), EMT, BS, AAS- Certified in Community Health

Dear Senator Micciche,

I am so grateful that you are a sponsor of this bill. I know that those opposed are fewer in numbers but not very kind and it seems to me unwilling to have conversations. I'm sorry for the flak that this has caused for you but very proud that you are willing to carry it through.

Of course you have seen the Raven youtube video. My visceral reaction to its cuteness is difficult for me to describe when I think of the people I have lost in my life to tobacco products. I think it is "catchy" and repugnant and so very clever that I would imagine there are similar videos out there in the rest of the America - it was quite professionally done and the local folks are such a good touch.It's also such a nice touch that KSRM is making it available on its website.

I would love to know how they came up with the statistics that they were so willing to show us. The good news is that we
know that we have more than 400 groups and businesses and corporations that are real and endorsing smoke-free work places.
(and mostly Alaskans profess not to care how they do it Outside).

Children also come into places where tobacco is sold and they are especially susceptible to secondhand smoke. And employees everywhere deserve clean air in the workplace.

Thank you for continuing this fight to help Alaskans stay healthy. It is good for lives and for economics.

One additional comment is about exemptions that some are suggesting. If a tobacco store is in a mall setting, stores around it will not be smoke-free. So would free-standing stores be exempt and others not. It is a slippery slope, as they say.

Sincerely,
Susan Smalley

Dear Senator Micciche,
Tobacco use is the number one cause of preventable deaths in the US and causes over 400,000 deaths a year. As a health care worker, we see everyday that most diseases are complicated or caused by tobacco use. Please continue to fight for the right of all Alaskans to work and thrive in smoke-free environments. No one should be subjected to harmful and toxic secondhand smoke in order to make a living. Secondhand smoke causes over 50,000 deaths a year in the US. Ensuring that all workplaces in Alaska are smoke-free will help lower these numbers and literally save tens of thousand of lives!
Thank you for your support!

Dear Honorable Peter Micciche,

I would like to take this opportunity to express my support for SB209 and HB360, which will ensure that all workers are protected from exposure to secondhand smoke emitted from combustible tobacco products and from secondhand aerosol emitted from electronic cigarettes.

As a citizen who resides and works in prevention and health services in the central Kenai Peninsula, I am well aware of the health consequences associated with tobacco use and other harmful substances. Your inclusion of e-cigarettes in this legislation is of particular interest to me because of recent studies, as well as anecdotal evidence across the country, that e-cigarettes, by their design, are now being used as delivery devices for not only nicotine but also liquid THC (marijuana) and other opiates. In addition, the scientific evidence is mounting that the aerosol emitted from e-cigarettes is not simply a harmless water vapor, rather it contains chemicals and particulates that are known to cause significant breathing problems, at a minimum.

Working in the prevention and health field for over 25 years, I am well aware of trends that could endanger the lives of future generations. The seductive advertising used by e-cigarette companies, the appealing nicotine flavors offered, and the appeal of anything electronic to young people makes me very appreciative that e-cigarettes are being treated as cigarettes in this bill. We do not want to set up another generation of Americans for nicotine addiction.

Sincerely,

Dear Senator Micciche;

I am a BIG supporter of a smoke-free and tobacco-free workplace, and I am glad that you are also. I understand that you will hear some grumblings from smokers who do not want to go outside during our cold Alaskan winters to smoke, but I can attest to the health benefits. I work at Chugachmiut that has smoke-free policies. But, it was while I was at Kodiak Area Native Association where I saw some of the greatest changes. A number of my co-workers- many of whom had smoked for decades- gave up smoking altogether when we went smoke-free. There is a bit of political heat that you will feel from people who believe that these initiatives trample on their "rights" to smoke or create toxic secondhand clouds in the workplace, I am sure; but when you weigh these instances of malcontent against the lives saved and the cleaner indoor air that we breathe, it is well worth the fight. Thank you for your support of these efforts!

Sent: Wednesday, April 02, 2014 4:56 PM
To: Sen. Peter Micciche; Rep. Lindsey Holmes; House Health and Social Services; Senate State Affairs
Subject: Smoke-Free Alaska

To Whom it May Concern in Juneau:

We take our smoke-free air for granted, until it is in our face, or more disturbingly, in our children's faces. We all have a right to the expectation of smoke-free air.

My father, Harold Murray Sparck was a natural resources consultant. From 1969 on, he worked tirelessly to build up the first grass-roots environmental movement to represent Native interests as stakeholders in resource exploration and exploitation, namely for the Yup'ik / Cup'ik of the Yukon Kuskokwim Delta, but for other demographics of the coastal and interior areas of the State. With Nunam Kitlutsisti (Stewards of the Land,) AVCP, the Bering Sea Fishermen's Association, the United Nations Convention on the Law of the Sea, the State of Alaska and the Alaska Board of Fisheries, Alaska Board of Game, the Mink Festival, the Community Development Quota's, and the Migratory Bird Treaty Act, my father and many of his contemporaries subjected themselves to thousands of hours in meetings as engaged citizens and advocates. In those days, my father had to endure rooms full of second-hand smoke for as much as 10 hours a day in marathon meetings. He'd come home from a trip and his luggage and clothing would reek of smoke.

Unable to shake a cough, my father got an x-ray, revealing both lungs riddled with tumors. This was only a few weeks after his 51st birthday. The doctors gave him two weeks to live. He rallied enough to settle his affairs, but he died 10 weeks after diagnosis. My father was not a smoker.

The state of Alaska currently does not have a strong smokefree law. However many communities have passed strong local laws. The City of Bethel was one of the first communities to opt for a smoke-free law, three years after his death, in 1998. Anchorage, Klawock, and Haines County have passed 100% smokefree laws that cover all workplaces, including all restaurants and bars. It is still too much that only half of Alaska's population is covered by a current smoke-free workplace law. No one should have to choose between their health and a good working environment.

We need legislation to combat this workplace threat, secondhand smoke is a major cause of needless, preventable suffering and death. And it isn't only cancer we need to worry about, but non-smokers exposed to secondhand smoke increase their risk of heart disease and lung cancer by up to 30%. Ventilation and other "air-cleaning" methods cannot scrub the damage that secondhand smoke causes. Comprehensive smoke-free workplace policies are the only effective way to eliminate secondhand smoke exposure in the workplace. We know enough now about the dangers of smoking, and second-hand smoke, to do something about our workplace health.

Thank you for your time and consideration,

Michelle

State Capitol, Room 125
120 Fourth Street
Juneau, AK 99801-1182

Dear Senator Micciche,

I am a constituent and a supporter of a statewide smoke-free law that protects workers from the dangers of secondhand smoke. It's important that HB 360 move as quickly as possible through the Health & Social Services Committee. I urge you and the other committee members to approve this important legislation without delay.

This important measure will not only save lives, but will have a positive economic impact on the state.

Everyone has the right to breathe smokefree air.

Employees should not have to choose between their income and their health.

Thank you for your support. The HSS Committee is only the first step.
As the bill moves forward, your continued support will be greatly appreciated.

Sincerely,

Ms. Johna Beech

Senator Peter Micciche
AK

Dear Senator Micciche,

I support a state law to prohibit smoking indoors.

Breathing healthy smoke-free air is important to me and my family. All workers should be protected from the dangers of secondhand smoke in the workplace, and all Alaskans should be protected from secondhand smoke in public places. Please include e-cigarettes in this legislation.

Thank you.

Sincerely,

Dr. Christopher Jung

I like to keep up on Alaska community events and stories. I've also got a thing for getting people to adopt pets. You've been warned.
