

Representative Kurt Olson, Chair
Labor and Commerce Committee
The Alaska State House of Representatives
State Capital
Juneau, AK 99801

Dear Mr. Olson,

I cant believe my eyes. The working people of Alaska want an increase to the minimum wage and a mechanism in place so we don't have pass around an initiative every 4-5 years to get you people to do your job, and House Rules wants to mess with it. Give me a break! HB 384 is nothing more than a stalking horse for bad employers so they can come back and take any increase away next year! Don't fall for this and don't have the audacity to tell me it is anything but a cheap trick, I know better. Vote NO on HB 384

Juneau, AK 99801

Dear Chairman Olson;

In 2002 Alaskans came together to support working people by getting enough signatures together to do what the legislature wouldn't - raise the minimum wage and inflation proof it. The legislature did then just what the Rules Committee is suggesting you people should do now and keep the question off the ballot. You people hoodwinked Alaskans then, don't think you will do it this time. If the initiative had been in place the legislature couldn't have touch it for two years and the inflation-proofing provisions would have taken care of the question and the working poor would be getting what todays initiative is proposing. **VOTE NO on HB 384**

Dear Chairman Olson;

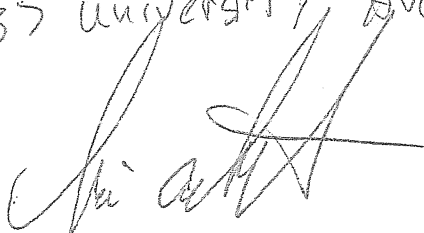

Please oppose HB 384. The Rules Committee can't fool me into thinking that they introduced this bill so the poor voters wouldn't have to be put upon to go to the polls and vote. They introduced this bill so that they could come back next year and gut it. If you guys want to do something helpful along those lines, why don't you pass a bill to take the SB 21 question off the ballot and just reinstitute the tax in January? That would be the thing to do, NOT beat my poor waitress out of a small raise.

Dear Chairman Olson;

HB 384 is a bad idea. I want to vote on the minimum wage increase this summer. What the legislature gives it can take away. At least with the initiative, you guys cant mess with it for at least two years. The last time it was raised, which was close to four years ago, it only increased fifty cents. Fifty cents in four years??? That's ridiculous. Anyone trying to get by on that is hurting and could use a bump and there are plenty of them. Help the people who work for a living, kill 384 and let voters vote so the legislature won't gut the law again

Dear Chairman Olson;

I just read that the legislature is looking to undermine the efforts to get the increase to minimum wage on the ballot for the people to vote on. I don't support that. I want to vote on this issue when I go to the polls this summer. Please oppose HB384. If you want to "preempt" a question on the ballot, pass one that will take SB 21 question away and then repass it in January.

Respectfully

Dear Chairman Olson;

The legislature should not pass HB 384 because it does nothing more than make it possible for the special interests to come in and gut out the important sections of the minimum wage protections in the initiative. Let's keep hope and integrity alive and not bow to focused special interest groups from outside. The initiative process protects the provisions by making sure the legislature can't change the people's will for at least two years. This protected time is important because it keeps the outside special interests at bay till working people have a chance to benefit from the fruits of their labors. Vote No on HB 384.
