

Personalized Learning Opportunity Grants in SB 100

Innovation with Accountability through AASB's 1:1 Digital Learning Program

Instructional Strategies Using 1:1 Technology

The Legislature has focused on improving student achievement, using data effectively and increasing accountability for education funding.

One way SB 100 accomplishes these goals is with Personalized Learning Opportunity grants and AASB's 1:1 Digital Learning Program. 1:1 technology, compatible with local infrastructure, can change instructional practice so that every student benefits. With a commitment to a proven plan, these learning environments can:

- dramatically expand teaching and learning resources
- transform instruction
- increase capacity to meet all student needs
- increase student engagement
- provide opportunity for cost containment/cost reductions
- deliver personalized learning

**Data verified by University of Alaska Fairbanks.*

Study: An analysis of the Association of Alaska School Boards 2011-2012 "iPad for Literacy" Project (1/13).

Graph numbers indicate point gain in reading assessment.

Districts participating in HD6 iPad Project study: Alaska Gateway, Copper River, Delta Greely, Iditarod, Kuspuk, Nenana, Tanana, Yukon Flats, and Yukon Koyukuk.
