March 8, 2013

Dear Representative Costello,

It was great to have sat and talk to you a few weeks ago in Anchorage; I thank you for your time....

At this time, I want to thank you for sponsoring HB 158 which authorizes DNR to implement a Guide Concession Program. The Guide Concession Program is not just good for the guiding industry, but all Alaska, from the resident hunter to the rural subsistence user, but most of all the long term benefit to Alaska's wildlife.

The implantation of the Guide Concession Program will bring hundreds of jobs to Alaska, from the big cities, to our rural communities and villages which in some case bring the only economic income that they may have. The industry also provides hundreds jobs each year which include guides, packers, lodge and camp helpers, pilots, boat captains, cooks, expeditors, and taxidermist to name a few...

Putting the Guide Concession Program in place, will also reduce impact on the present state guide use areas that are currently over crowded. This in turn, will create less impact on Alaska's resources and wildlife.

With a stable guide concession program in course, will bring the non-resident hunter to Alaska which in turn will bring economic benefits to Alaska. Currently 70% of Fish and Game conservation budget is the result of revenues from the sales of non-resident tags and licenses in the state.

So I am encouraging you to support the Guide Concession Program for the future of the Alaska's guiding industry and for the future economic benefits for Alaska.

Any questions, please call my cell 907 229 5060 or viper@acsalaska.net

Regards,

Samuel T Fejes

Subject: Guide Concession Program support

Dear Senators and Representatives,

As a resident of Alaska who enjoys the outdoors and the hunting and fishing opportunities afforded us in our great state, I am in full support of House Bill 158 and the creation and implementation of a Guide Concession Program on State of Alaska land administered by the Alaska Department of Natural Resources. I realize how reducing the overcrowding of guides on State land will benefit all of Alaska. It will enhance the hunting opportunities for resident and non-resident hunters alike and promote better stewardship of our lands and resources by those guides that do operate on State lands. The Guide Concession Program will not adversely affect the rights of resident hunters whatsoever and can only enhance my experience when I am afield hunting each year as there will be less pressure on the resources.

This program will help to reduce the number of guiding operations in any given area and will benefit long term wildlife conservation. The guiding industry is one of our oldest industries here in Alaska and provides great economic benefit to small communities and villages around the state providing hundreds of good jobs in our communities including guides, pilots, boat captains, packers, cooks, expeditors and taxidermists, etc.. and contributes a lot of financial resources to our local economies. The Guide Concession Program is crucial to the long term stability and sustainability of the Big Game Guiding industry in the State of Alaska.

Please lend your full support to House Bill 158 and work towards making the Guide Concession Program a much needed reality.

Sincerely,

Clover Tiffany

Subject: DNR Guide Concessions Program

Dear Representative Costello,

My name is Dale C. Myers and I am a life-long resident of Bristol Bay and South West Alaska. I am a commercial fisherman, pilot, guide and subsistence user. I have served on the South West Alaska Regional Advisory Council (RAC) and am active in other conservation areas. The health of this State's fish and game are very important to me. I have seen many changes in this area since I was younger and I am growing worried that the guided hunting pressure on state lands that is now so common is going to be very harmful to our game populations and the way of life that so many people out here depend on, both subsistence users and other guides. That is why I am asking for your full support of the DNR Guide Concessions Program. It is critical for maintaining a healthy sustainable guiding industry and for ensuring that subsistence users have ample opportunity to harvest the animals they need.

The DNR program, if it goes through, will go a long way in stopping many of the fly by night outfitters that abuse the resource and do not have any ethical standards. It will make enforcement easier and efficient. The DNR program will make sure that only the very best applicants are awarded guide areas and are allowed to operate. This will lead to better quality of experience for the non-resident guided hunter. Also, by reducing the number of guides on state lands, the serious guide overcrowding issue on state land will be completely eliminated. Similar concession programs and special use permits are used on Federal lands (NPS and FWS) and have worked great, benefiting all user groups and the resource. The same will happen on DNR lands. In the end, the DNR GCP will ensure that the game populations on our state's lands which so many people depend on will be safeguarded and used to the maximum benefit of all user groups. Subsistence users will have better opportunity. Non-resident guided hunters will have better quality of experience. General resident hunters will have less competition for the resource. Guides in general will be far better off because

the quality of experience for the clients will go up and the game populations will be healthier, for now and for future generations.

If the DNR GCP does not go through then there is a really good chance that the Board of Game will implement permit draw in order to deal with these serious issues facing state land. No guide wants this. It will ruin guiding making it impossible to make a living as a guide. Game populations will continue to suffer and all user groups will continue to lose allocation. Subsistence users will lose out as well. It is extremely important to keep in mind that this program is just not for the benefit of guides. I am a subsistence user myself and I know for a fact that this program will do more to benefit subsistence and other users more than anything else. A few guides will lose out in the end because the program limits the number of guides in an area, but the great majority will benefit and most importantly our animals, subsistence users and resident hunters will be better off.

I appreciate your time and hope you take this matter into consideration.

Sincerely,

Dale C. Myers

Subject: House bill 158

Representatives,

My name is Brian Peterson and I am a Master Guide and Outfitter in the state of Alaska. I would like to send my support for house bill 158 to save the guiding profession in the state of Alaska.

I am a full time resident who operates a hunting and fishing lodge on Kodiak Island. The guiding profession has been under attack by "hobby guides" for the last couple of decades. These guides are part timers, who generally arrive in an area and operate on top of the well established operators causing conflict and over harvest of resources. I personally have had four new "hobby guides" start operating on top of me in the last five years. I have been in the same location the last 29 years with substantial investment in the area.

If the DNR guide concession program is not implemented in the very near future the board of game will greatly reduce non resident harvest, reducing state income, and guaranteeing the entire industry becomes hobby guides, hoping to draw a permit for a client on rare occasion.

The industry has over seven years of developing the best option to save the profession. The DNR GCP is what has come out. While not perfect, it is the only legal option that can save the profession from the hobby guide industry.

To those who oppose this program, ask if they would prefer drawing permits for all non resident allocation and how long they have been operating in the same area. Also ask them what investment they have. This program has been a long time in being developed and is presently the only option that can save the profession.

You will find those who are opposed to this are generally part of the problem and do not offer a solution. Thank you for your consideration.

All the best,
Brian Peterson

Subject: DNR Guide Concession Program letter of support

Dear Representative Costello,

My name is Brian Cato I am a Bristol Bay resident that is asking for your support on the DNR Guide Concession Program. As a subsistence user, conservationist and guide (AG 7087) I believe this is a positive and long overdue step forwards in Alaska's long standing reputation of excellence in wilderness management and conservation.

The Guide Concession Program not only deals with overharvest of the animals I and so many others rely on to support our families but also addresses the problems involving overcrowding of guides on state lands. It limits the number of guides that can operate and restricts them to operations in designated areas according to set operations plans, much like on Federal Lands where similar systems have proven so effective. This will lead to better enforcement, increased numbers of quality healthy animals for everyone and provide the ideal wilderness experience for the hunters coming to Alaska.

If the DNR program is not implemented, we face the high likelihood that many of our hunting opportunities will be lost, and that permit draw will be implemented in areas that were once open. This will be detrimental to all users. If the DNR program does go through it will remove the legal and financial problems we face if game numbers dwindle to the point of having to implement a permit drawing for non-residents or have to eliminate

non-resident hunting altogether. In addition, this program will pay for itself off of fees collected from concessionaires.

For me this program is the best solution available for the use of State Lands, minimizing conflict between subsistence users and guides, increasing quality of experience for our visitors. Most importantly this program will protect the animals we are charged with safeguarding. As a subsistence user first and guide second, this is a critical, necessary program. Thank you for your time and consideration. Please support this program with your vote and the funding necessary to implement it.

With Best Regards,

Brian Cato

Sent: Thursday, March 07, 2013 11:00 AM
To: Rep. Mia Costello
Subject: HB 158

Dear Rep. Costello,

My name is Mike Munsey and I am a Master Guide on Kodiak. I was born and raised in the guiding industry and my wife, Robin, and I have been running Munsey's Bear Camp for the past 35 years. I have seen many changes to the hunting and guiding industry in Alaska in my lifetime and the Guide Concession Program proposed by the DNR is one of those changes that will have a very positive impact on hunting in general in Alaska. I understand you have co-sponsored the bill (House Bill 158) and I wanted to thank you for this and to let you know that I 100% support this bill.

This Guide Concession Program will not only benefit the guides who work in those areas, but also the resident hunters who hunt there, because it would reduce the number of guides in the area. Probably the biggest benefactor of this program will be the wildlife and their long term population health. If a guide knows he will be operating in a particular area for a set amount of time, he will be more concerned about the long term and will tend to be more conscientious about the conservation of the animals in that area. The guiding industry in Alaska provides hundreds of jobs and economic benefits to the state as well as the local towns and villages, and this program is vital to the long-term stability of that industry.

I should point out that this program would not effect my business. I operate on a National Wildlife Refuge and we have had a similar program in effect for over 20 years. It has been a system that has greatly benefitted the wildlife populations, nonresident hunters, and economy here on Kodiak, and this state program will do the same for state lands.

Thank you for your support of this bill.

Mike Munsey

Subject: HB 158

Dear Representative Guttenberg and Senator Hoffman,

I am writing to urge you to support HB158. As a resident hunter and outdoorsman, I fully support the creation of a Guide Concession Program on state land administered by the Alaska Department of Natural Resources. I feel that there are many areas of the state in which the game populations receive too much pressure from guided hunts. By implementing a Guide Concession Program this pressure should be reduced.

I believe that those guides who obtain these concessions will have an incentive to be good stewards of the land and the natural resources within their concessions. This can only benefit all Alaskans and visitors to our state who care about the state and its resources.

Therefore, I am asking you to lend your full support to House Bill 158 and work towards making the Guide Concession Program a much needed reality.

Thanks you for your time and consideration of this matter.

Sincerely,

Subject: Please support House Bill 158

Dear Alaskan Legislator,

I am writing today to urge you to pass House Bill 158.

I am a registered hunting and fishing guide in Southeast Alaska and DO NOT operate on State Lands because it is such a MESS.

The first year I became a registered guide in 2001, I conducted 3 hunts on State Lands in GMU 19 and saw what a cutthroat, screwed up, convoluted, air war the hunting had become on these wonderful lands. I even guided for an operator the year before in an adjacent area and saw how he was forced to operate because of ALL THE COMPETITION.

This is not what our non-resident and resident hunters need to see or participate in when they hunt in Alaska. Canada has exclusive guide use areas and the average guided sheep hunt retails at about \$20,000. In Alaska, the same sheep hunt retail at around \$10,000 due to the overhunting, crowding and conflicts in the field.

You have the opportunity to fix a very real problem in this state that many guides, non-resident and resident hunters, board of game members, biologists and concerned citizens have been dealing with for many years and of which the vast majority support. The ones opposed are very likely the operators on State Lands that are the problem and would likely disappear or at the least have to win a prospectus.

This selection process of choosing the top 2-4 guides to share a guide use area is a good thing. This is how most of us guides that operate on federal lands are regulated and it promotes and benefits:

- Resident Hunters by reducing the number of Guided operations in any given area
- Long term wildlife conservation
- Members of the Board of Game because they won't have to deal with the trickle down issues of overcrowding
- Guides because it introduces much needed long term stability of the Big Game Industry
- Non-resident hunters by having a quality hunt
- Hundreds of jobs in small communities, including guides, packers, pilots, boat captains, cooks, expeditors, taxidermists, airlines, etc.

This is the right choice for Wildlife Conservation, Resident Hunters, Non-Resident Hunters, Guides and the People of Alaska.

I urge you to support House Bill 158.

Sincerely,

Kurt Whitehead

Subject: House Bill 158

Dear Representatives Costello, Feige, Austerman, Herron and Millet,

I would like to sincerely thank you for sponsoring House Bill 158 and for lending your support to the creation and implementation of a Guide Concession Program. As a lifelong resident of Alaska who enjoys the outdoors and the hunting and fishing opportunities afforded us in our great state, I am in full support of House Bill 158 and the creation and implementation of a Guide Concession Program on State of Alaska lands administered by the Alaska Department of Natural Resources. As a resident, and a hunting guide, I realize how reducing the overcrowding of guides on State land will benefit all of Alaska. It will enhance the hunting opportunities for resident and non-resident hunters alike and promote better stewardship of our lands and resources by those guides that do operate on State lands. The Guide Concession Program will not adversely affect the rights of resident hunters whatsoever and can only enhance my experience when I am afield hunting each year as there will be less pressure on the resources.

This program will help to reduce the number of guiding operations in any given area and will benefit long term wildlife conservation. The guiding industry is one of our oldest industries here in Alaska and provides great economic benefit to small communities and villages around the state providing hundreds of good jobs in our communities including guides, pilots, boat captains, packers, cooks, expeditors and taxidermists, etc.. and contributes great financial resources to our local economies and is the way of life for many Alaskans and their families. The Guide Concession Program is crucial to the long term stability and sustainability of the Big Game Guiding industry in the State of Alaska and I firmly believe will, in the long term, be of great benefit to all Alaskans and our wildlife resources and lands.

Please continue to lend your full support to House Bill 158 and work towards making the Guide Concession Program a much needed reality and thank you again for taking the initiative and responsibility to sponsor this crucial bill and I look forward to its passage.

Sincerely,

Henry D. Tiffany IV
