Hello,

I am writing as a resident of Fairbanks to note that I am very interested in making Natural Gas accessible to Fairbanks residences and businesses. Heating oil is unbearably expensive, and finding ways to lower my heating bill are necessary. Please do all in your power to make natural gas accessible to Fairbanks as soon as possible.

Representative Olson,

I am writing to express my support of HB74. Like many families in Fairbanks, our family is struggling each month to pay utility bills that exceed our monthly mortgage payment. My husband and I both work to provide for our family and would be willing and able to switch to natural gas if it was available.

There have been numerous public meeting in Fairbanks regarding the plan and the support from Fairbanks is clear. We support a program that will allow our area of the state to utilize the same utility resources other large cities utilize in our state. Just this past fall, our family personally knew 4 families that moved to Palmer due to the cost of utilities in Fairbanks compared to Fairbanks.

I have not been able to provide public testimony due to my children being on spring break but I hope this email serves as evidence of my support.

Rep. Olson-
Why is it so difficult for you to get us an affordable heat source in the interior.
Regards,

Dear Mr. Olson,

I am a member of the Fairbanks League of Women Voters and helped with registering voters as well as assisting with the candidate forum held at the Tanana Valley State Fair last fall. With due respect, I beg to differ with you about the lack of interest in a plan for trucking gas to the interior. Please reach out to your colleagues from Fairbanks and ask them directly what their constituents are wanting. I am 100% positive that every single one of them will tell you that the energy crisis and relief in the interior is the number one issue on the minds of the people. In addition, I attended the town hall forum a few weeks ago and Senators Bishop, Coghill, Kelly and Hoffman will all report that this is the number one item on their list of priorities. Thank you for looking into this issue and please consider those of us who are being squeezed to death by the exorbitant cost of energy in the interior or Alaska.

Sincerely,
Sherry Blizzard
