FISCAL NOTE ANALYSIS

STATE OF ALASKA 2013 LEGISLATIVE SESSION

BILL NO. HB 30

Analysis

This Bill initiates annual performance audits and reviews of Executive Branch agencies beginning with calendar year 2014, and continuing annually on a 10-year cycle based on the schedule proposed on page 4, Section 5 of version U of the bill.

For purposes of this fiscal note it is assumed that all additional resources contemplated by the bill to perform the performance audits and reviews would come from outside of the Executive Branch, and that the agency or agencies that are under review would not be charged an administrative fee or fees by the review team in order to fund the costs of the reviews. It is also assumed that the agency or agencies under review would not need to expend additional resources or create new systems or data to support the review team's effort. The Office of Management and Budget would be statutorily required to provide the performance review team the following documentation:

(1) A 10-year growth history and a 10-year projection of agency expenses by funding source; and
(2) Organizational charts, personnel charts by location that show the number of positions and the functions of each position, and a list of transfers of personal services funding to or from other line items within the agency during the preceding 10 years. See page 6 Section 6, lines 8-13 of version U.

For the purposes of this fiscal note, it is assumed that these requirements would be met through the provision of information and documentation that is routinely provided to the legislature by the Office of Management and Budget and that no unusual or extraordinary use of resources are required.

The requirements of (1) above are assumed to be satisfied through the provision of historical data available from either the Alaska Budget System (ABS) or in a cooperative effort between the Office of Management and Budget and the Legislative Finance Division. Agency 10-year expenditure projections are assumed to be the same projections that are provided to OMB as part of the annual 10-year planning process. It should be noted that it is highly probable that some level of OMB staff time would need to be devoted to providing assistance to the review team staff or contractors in order for them to best interpret the historical and projected data that is available for the agencies from these sources.

The requirements of (2) above are assumed to be satisfied through the provision of organizational charts that are routinely published by the Office of Management and Budget as part of the annual publication of the agency budgets. Attached is an example of the type of staffing charts currently produced. If these do not provide adequate information to the review team, additional effort would be required that is not reflected in this analysis. The requirement to provide the review team with a list of transfers of personal services funding to or from other line items within the agency during the preceding 10 years is assumed to be met by the semi-annual reports that have been required through appropriation bill language since 2009. Information on this item is not available from the Office and Management and Budget prior to 2009. It is assumed that OMB would not be required to construct this information prior to FY2010.

It is also assumed that agency travel budgets would not be adversely impacted by the public hearings called for on page 5, section 6 lines 28-31.

As further information becomes available regarding the implementation of this legislation, it is possible that the fiscal note would need to be revised to reflect costs that are not identified at this time.
