ASSOCIATED REGULATIONS

Does the bill direct, or will the bill result in, regulation changes adopted by your agency? No
If yes, by what date are the regulations to be adopted, amended or repealed? N/A

Why this fiscal note differs from previous version:

The committee subsitute adopted by the House Resources Committee makes changes to the third criteria of the Gross Revenue Exclusion and also amends what critera DNR must utilize to approve an application for the alternative tax credit for oil and gas exploration in "Middle Earth".

Prepared By: William C. Barron Phone: (907)269-8800
Division: Oil and Gas Date: 04/05/2013 08:00 AM
Approved By: Daniel S. Sullivan, Commissioner Date: 04/05/13
Department of Natural Resources

FISCAL NOTE ANALYSIS

STATE OF ALASKA
2013 LEGISLATIVE SESSION

BILL NO. HCS CSSB21(RES)

Analysis

HCS CSSB21(RES) reforms the oil and gas production tax system in Alaska. This bill will not result in any procedural changes in how the Division of Oil and Gas operates and therefore the Department of Natural Resources (DNR) does not anticipate any fiscal impact to the Department's operating budget.

HCS CSSB21(RES) proposes to improve Alaska's competitiveness and encourage producers to invest more by simplifying the oil and gas production tax system. First, this bill repeals the progressive tax structure, which will help encourage the type of long-term planning and investment needed to promote new investment in new production in Alaska. Further, this bill attempts to shift incentives away from spending and provides new incentives to reward new production.

This bill also amends AS 43.55.025(a)(6) and (m) to clarify that in order to qualify for the alternative tax credit for oil and gas exploration, DNR must approve based on criteria established in AS 43.55.025(c)(1), (c)(2)(A), and (c)(2)(C) thereby removing the 3-mile exclusion for areas classfied in AS 43.55.025(o), known as "Middle Earth".

A new subsection AS 43.55.160(f) provides the gross revenue exclusion (GRE) for 20% of the gross value at the point of production for 10 years following the commencement of production from the well. The GRE applies to production from leases or properties containing land that is north of 68 degrees North latitude and meets one or more of the three criteria: (1) is produced from a lease or property that does not contain a lease that was within a unit on January 1, 2003; (2) is produced from a participating area established after December 31,2011, in a unit formed before January 1, 2003, if the participating area does not contain a reservoir that had previously been in a participating area established before December 31, 2011; (3) is produced from acreage that was added to an existing participating area by DNR on and after January 1, 2014, and the producer demonstrates to the department that the volume of oil or gas produced is from acreage added to an existing participating area. This section also clarifies that the GRE may not reduce the gross value at the point of production below zero.

At forecasted price ranges, overall government take and marginal tax rates are reduced materially. To the extent that investments are made as a consequence of these changes to the tax regime, royalty revenue may rise. The fiscal impact on royalty revenue is an indeterminate positive.

Analysis Continued

Differences in Royalty Revenues from New Production Scenarios in $Millions*

*Note: These scenarios are based on Department of Revenue modeling.

At Forecasted Production

	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
$ 120	$0	$0	$0	$0	$0	$0
$ 100	$0	$0	$0	$0	$0	$0
$ 90	$0	$0	$0	$0	$0	$0

Additional Production Scenario A

Forecasted production plus 50 million barrel field developed by a New Entrant

Oil Price in $/barrel	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
$120	$0	$0	$0	$12	$24	$35
$100	$0	$0	$0	$10	$20	$29
$90	$0	$0	$0	$9	$17	$26

Assumes field outside of a current unit and subject to gross revenue exclusion, first oil in 2017 and peak production of 10,000 barrels per day in 2019. Total development cost of $500 million.

Additional Production Scenario B

With addition of 4 oil rigs to legacy fields drilling from 2014-2019

	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
$120	$57	$106	$147	$181	$212	$179
$100	$47	$87	$120	$148	$173	$146
$90	$42	$77	$107	$132	$154	$130

Assumes each oil rig drills 4 new production wells per year, with each well producing 1,000 barrels of oil per day and declining at a rate of 15% per year. Development costs for each well assumed to be $20 million.

Additional Production Scenario C

With new well pad and 4 additional rigs in legacy fields, plus new 10,000 bopd field starting in 2017

	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
$120	$111	$213	$307	$433	$557	$533
$100	$91	$174	$251	$354	$455	$435
$90	$81	$155	$223	$314	$404	$386

Assumes new well pad within major North Slope unit producing a total of 125 million barrels of new production over an 8-year period starting in 2015 at total development costs of $5 billion. Also includes scenario B above with 4 oil rigs in legacy fields and scenario A above with the addition of a new 50-million barrel field.
