 Date: 01/16/15

FISCAL NOTE ANALYSIS

STATE OF ALASKA
2015 LEGISLATIVE SESSION**Analysis**

This bill would expand the conditions under which the state could offer negotiated timber sales under AS 38.05.110 and .118. Under the existing statutes, the Department of Natural Resources (DNR) may not offer negotiated timber greater than 500,000 board feet unless the sale area has high unemployment, underutilized manufacturing capacity, and an underutilized timber supply that will lose value due to insects, disease, fire, or conversion to nonforest uses. These criteria prohibit larger negotiated timber sales in many areas of the state that are actively managed for forestry, and where there is high demand for wood for timber products and biomass energy. This bill would allow DNR to offer negotiated sales statewide within the limits of the sustained yield supply, and subject to a best interest finding under AS 38.05.035.

While it is anticipated that for most timber sales, a competitive bid process will continue to be in the best interest of the state, this bill would enable DNR to better respond to the economic realities and geographic variability in the forest products sector in Alaska.

There are no short-term impacts on revenue, but over time, revenues should increase as the industry diversifies to address energy needs and demand for locally sourced wood products for communities. This legislation will not place any additional demands on the current operating budget and thus the zero fiscal note.
