FISCAL NOTE ANALYSIS

STATE OF ALASKA
2015 LEGISLATIVE SESSION

BILL NO. HB 114

Analysis

Risk Management (RM) would be financially impacted by this proposed legislation.

Currently under the Alaska Worker's Compensation Act, AS 23.30.190 (a), the whole body rating is \$177,000. This bill would increase this rating to \$255,854. RM's five year average of whole body Permanent Partial Impairment (PPI) rating payouts to injured employees is \$1,200,000. The change in the whole body rating would amount to a 44% increase which would translate to an average annual payout of \$559,680 based on a PPI payout of \$528,000 with \$31,680 in second injury fees.

This bill also adds a provision to increase the whole body rating annually based on the Consumer Price Index for Anchorage. Based on the last five years of CPI data, we used an estimated 2% annual increase. Link to Department of Labor, Research and Analysis section data:<http://laborstats.alaska.gov/cpi/cpi.htm>. However, no costs were added to fiscal note for CPI. Trends in cost of living seem to be entering a deflationary period so the impact of CPI is unknown.

This bill would also amend AS 23.30.215 to add section (a)(6) to provide a PPI benefit in a death case where the deceased employee has no dependents, by providing a one-time lump sum payment equal to 50% of the whole body PPI of \$255,854, which would amount to a benefit of \$127,927 to the estate of the decedent. Currently, the death benefit to an employee with no dependents is limited to funeral expenses not to exceed \$10,000 under AS 23.30.215(a)(1). This bill would increase the death benefit in this circumstance from \$10,000 to \$127,927, or an increase of \$117,927. In the last five years, only one state employee suffered a work related death and had no dependents. If future experience follows past history, This bill could result in a yearly average increase of \$23,585.40.

The potential cost increase for this bill as noted would impact the costs for workers compensation as charged out to our customer agencies via the annual cost allocation method. Traditionally, the Department of Transportation, Department of Corrections, and Department of Health & Social Services experiences the highest workers compensation costs while the Department of Public Safety experience the most on the job fatalities.
