Solicitation Title: DNA Capacity Enhancement and Backlog Reduction Program

Description:

NIJ seeks proposals for funding for the FY 2014 DNA Capacity Enhancement and Backlog Reduction Program. This program funds States and units of local government with existing crime laboratories that conduct DNA analysis to process, record, screen, and analyze forensic DNA and/or DNA database samples, and to increase the capacity of public forensic DNA and DNA database laboratories to process more DNA samples, thereby helping to reduce the number of forensic DNA and DNA database samples awaiting analysis. In general, eligible applicants are given the opportunity, based on their individual needs, to determine what portion of their anticipated funding should be used for capacity building purposes and what portion should be used for analysis of forensic DNA and/or DNA database samples.
