What is Commercial PACE?

- PACE was named one of the top 20 “world-changing ideas by Scientific American magazine.”
- Commercial Property Assessed Clean Energy programs (PACE) allows commercial property owners to finance qualifying energy efficiency improvements over time through a voluntary assessment on the property tax bill.
 - Voluntary participation by municipalities AND commercial property owners
 - Mortgage holder consent is required before applications are approved and assessments are placed
 - Improvements can include lighting upgrades, renewable energy, conversion to natural gas, high-efficiency boilers, and additional energy efficiency improvements
- The repayment obligation transfers with the sale of property

Benefits

- Energy efficiency upgrades are financed with capital secured by a primary lien on the property, lower-interest capital and favorable repayment terms can be raised from the private sector
- Allows for longer repayment periods allowing the building owner to recognize immediate operating savings while repaying the debt
- Can use traditional lending sources
- In Alaska, provides consistency with state energy policy, energy efficiency and renewable energy goals

Creating a PACE Program

- 31 states have authorized PACE programs
- State legislatures must provide authority for local governments to establish and operate commercial PACE programs
- Municipalities to create the program and select financing models
- Resources: U.S. Department of Energy, PaceNow.org, C-Pace.com

Potential PACE Models

- Local-government driven
 - Either property assessment office or a PACE office used as interface with commercial property owners and potential lenders
 - Bond financing
- Private-sector driven
 - Third-party administrator under contract with local government
 - Private financing
- Hybrid model
 - Smaller local governments can contract with other communities or regional organizations to administer the program
 - Identify all potential funding sources (bonds, revolving loan funds, private capital)
