## OUR STORY

Tanana Watershed Mitigation Bank provides cost effective and efficient compensatory wetland and streambank mitigation credits and Permittee Responsible Mitigation (PRM) projects. We are locally led and specialize in mitigating wetlands and streambank impacts within the Fairbanks USACE District.

We are the first bank in Interior Alaska and operated by the Salcha-Delta Soil and Water Conservation District, in partnership with the Fairbanks Soil and Water Conservation District.

Our goal is to support and encourage sustainable and responsible development in Interior Alaska through cost effective mitigation solutions that focus on natural resource conservation and restoration.

## WHAT IS WETLAND MITIGATION BANKING?

We sell credits that allow private developers, federal, state, and local governments to meet wetland mitigation requirements.

## WHY CHOOSE US?

- ★ We are local Alaskans who live and work in Fairbanks and Delta Junction.
- ★ Your money stays in the Interior and benefits your family, friends and neighbors.
- ★ You are investing back into your community.

## SUSTAINABILITY

Wetlands are the key to the water quality of today and tomorrow. We promote sustainable development in cooperation with effective wetland and streambank conservation.
