FISCAL NOTE ANALYSIS

STATE OF ALASKA
2017 LEGISLATIVE SESSION

Analysis

SB 32 allows a substitution of a prescription for a biological product with an interchangeable biological product. If the original prescribed product is not available in the pharmacy or is more expensive than an interchangeable product, the pharmacist may choose to dispense the interchangeable product. Substitution would allow for more availability of a biological product, and lower cost to the patient. This bill requires the pharmacy to contact the prescribing practitioner if a substitution of the original prescription of a biological product is made with an interchangeable biological product.

In addition this bill requires the Board of Pharmacy to post and maintain a link to the US Food and Drug Administration's list of all currently approved interchangeable biological products on the board's website.

The bill does not specifically change the pharmacy licensing program. However, it does allow a broader scope for a pharmacist to dispense an equivalent product more available to a patient.

If the bill passes the division will require \$4.5 for legal costs to amend regulations, printing, and postage in the first year.

Professional licensing programs within the Division of Corporations, Business and Professional Licensing are funded by Receipt Supported Services, fund source 1156 Rcpt Svcs (DGF). Licensing fees for each occupation are set per AS 08.01.065 so the total amount of revenue collected approximately equals the occupation's actual regulatory costs.
