* Alaska income tax revenue estimate is based on an ITEP analysis finding that the updated personal income tax proposed in HB115 (based on Federal Adjusted Gross Income with rates ranging from 0 to 7 percent) would have raised \$686.5 million if implemented in Tax Year 2016. This was adjusted to TY2015 levels by assuming a growth rate of 0.81 percent. Alaska's actual 2015 personal income of nearly \$41.5 billion was reduced by \$553.0 million to approximate the impact of HB115 in reducing the Permanent Fund Dividend (assuming a reduction from \$2,072 to \$1,250 per person in 2015).

** This is an unweighted average for the 41 states with broad-based personal income taxes.
