Summary:

Lee is a licensed mechanical engineer and certified commissioning authority with over 36 years of experience in the design and construction of mechanical systems in buildings. 33 years have been in Alaska. His career in construction began at age 16 when he and two friends started a commercial painting company in Casper Wyoming specializing in building exteriors and parking lot striping. Lee moved from Casper Wyoming to Alaska in 1983 to work for a local engineering firm. He became active in local professional organizations and non-profit arts and social organizations immediately upon moving to Anchorage. In 1992 Lee became the Mechanical Principal Engineer at RSA Engineering and worked with the two co-founders of the firm to provide management of the 30 person engineering firm. In 2003 Lee left RSA to start his own consulting firm, Support Services of Alaska, specializing in commissioning of buildings throughout the state of Alaska. In 2006 Support Services of Alaska was purchased by The Superior Group Inc. and Lee became the General Manager and now runs the business for TSGI.

Lee raised three sons and was active in their extracurricular and school activities. Lee has been active in multiple professional and community organizations throughout his time in Alaska. Lee believes it is the Alaskan community that has allowed him to succeed in his career and provided him the opportunity to become the person he is now. Lee believes it is his civic duty to give back to the community through active participation, charity, and encouraging others to do the same.
