Subject: HB 60 Motor Fuel Tax

Dear House Finance Committee Members,

Please receive this email as an opposition to the proposed motor fuel tax. The price of gasoline is already much higher than the national average. The proposed tax will create another hardship for rural communities and communities off of the road systyem. Our gasoline costs in Homer are substanciallly higher than Anchorage. For rural and bush communities, where all goods and services are higher and economic opportunities are lower, this tax will unduly effect those communities. Instead, I ask what's happening with the subsidies to oil companies?? Hopefully, the income tax will pass. It's time to stop these giveaways.

Thank you,
Karen Murdock
