---

Hi Forrest,

Latest Herd Estimates:

Western Arctic 201,000

Teshekpuk 42,000

CAH 22,000

Porcupine 197,000

On average over the last 109 years:

For primarily the Porcupine and Central Arctic, 82% of non-residents are unguided (about 350 NR hunters/year hunt unguided) (Units 24A, 25A, 26B, 26C)

For primarily Teshekpuk and Western Arctic, 77% of non-residents are unguided (about 2326 NR hunters/year hunt unguided) (Units 23, 26A)

Because of herd mixing, the board would have to promulgate regulations by Game Management Unit to implement the statute.

Let me know what else you need,

Bruce
