Spring 2017 Revenue Forecast

April 14, 2017

Randall Hoffbeck  
Commissioner  
Alaska Department of Revenue

---

## **FORECASTING METHODS: Introduction**

- All data is based on the DOR Spring 2017 Forecast.
- This is a forecast. All figures and narratives in this document that are not based on events that have already occurred, constitute forecasts or “forward-looking statements.” These numbers are projections based on assumptions regarding uncertain future events and the responses to those events. Such figures are, therefore, subject to uncertainties and actual results will differ, potentially materially, from those anticipated.
- This forecast supersedes all prior estimates or forecasts as the official forecast of the department. Therefore, all prior forecasts should be used only for comparison purposes.

## **REVENUE FORECAST: Revenue Available for Appropriation**

- Useful for outside analysts not familiar with Alaska's budget conventions
- Better reflects ability of state to meet its obligations
  - Alaska has a budget framework that restricts certain revenue based on constitution, statute, or customary practice
  - The ability of the state to meet its obligations is not fully reflected by the UGF revenue category
- All revenue subject to appropriation for any purpose can be used by the legislature to fund government services or obligations, including:
  - Constitutional Budget Reserve Fund
  - Earnings Reserve of the Permanent Fund

# Spring 2017 Advisory Bulletin

---

## REVENUE FORECAST: Advisory Bulletin Impacts

### ➤ DOR Advisory Bulletin (2017-1)

- Clarification of existing regulation regarding the application of per-taxable-barrel credits for non-GVR oil (024(j))
- If a company applies 024(j) credits, they cannot use other credits to reduce below minimum tax
- A company can forego their use of the 024(j) credits and use other credits to reduce below minimum tax (if allowed)
- Estimated Impacts:
  - 2014 to 2016 Tax Years: ~ \$50 - \$100M tax due to the State
  - 2017 and 2018 small UGF increases
  - Credit transfers decrease in FY 2018, thus less are used against tax liability. This increases both tax revenue and balance of credits outstanding.
