

Dear House Finance Committee members,

Attached is a proposed amendment to SB88 (concerning Mental Health Trust lands), which I hope you will put before the committee for consideration at the Finance Committee hearing today.

The purpose of the amendment is to solve the problem posed by the adverse locations of certain parcels of AMHT resource lands within communities by turning the bill into a federal buyout of those lands instead of the land swap currently written into bill. AMHT has acknowledged that a buyout at fair market value would be acceptable.

Enactment of my proposed amendment would notify our congressional delegation that the state desires the same change in the related federal bills.

This amendment is needed because it would be a travesty for the state to approve a deal that could result in 19 square miles of continuous clearcuts in just a few parcels on Prince of Wales Island and in 13 square miles of continuous clearcutting in a single parcel in central Revilla Island. Forest and wildlife habitat in Central Revilla has also been heavily impacted by clearcut logging. That includes nearly 6 square miles of clearcutting by AMHT in a parcel adjacent to the proposed new parcel there, and other adjacent clearcutting to the south.

There is no limit on clearcut size under the Alaska Forest Resources and Practices Act (FRPA). AMHT has demonstrated that it will take advantage of this extreme looseness in FRPA, as shown in the comments by GSACC in the SB88 record.

I ask that SB88 be set aside today so that my proposed amendment can be reviewed and be considered in a future committee meeting.

Please add this message and its attachment to the SB88 record.

Sincerely,

-- Larry
