

Thanks Taneeka, this looks good to everyone.

One thing we wanted to bring to your attention is the prohibition on scanning and retaining supporting docs for non-compliant IDs/DLs (p 3 lines 1-2, p 5 lines 19-20). I believe Leslie discussed this with Rep. Seaton at the last hearing.

To recap, we currently retain digital copies of primary and secondary documents (for a minimum of 15 years, non-commercial). This allows us to issue duplicate cards to those who lose their ID/DL, and allows us to offer online renewals. We also use these records in our internal auditing process to ensure DMV employees are collecting the required documentation. DPS and other law enforcement agencies access this information for criminal investigations.

The bill as written prohibits us from copying, scanning, or retaining in any form these supporting documents, when issuing a non-compliant ID/DL.

This will:

- Reduce our ability to monitor the documentation presented to DMV employees, **hindering quality control and fraud prevention efforts**
- Eliminate online renewals for IDs/DLs, decreasing customer service
- Eliminate our ability to provide duplicate cards, decreasing customer service
- Reduce by an estimated 50% the records public safety can access for information vital to criminal investigation (based on the experience of other states, we estimate potentially 40-50% of Alaskans will chose a non-compliant ID/DL) hindering public safety efforts
- **Stymy our efforts to expand services offered by our Business Partners –** without the ability to perform our electronic auditing on BP's documentation collection, we may restrict them from issue non-compliant IDs/DLs, decreasing our efficiency and customer service

Our intention in offering this legislation was to offer Alaskans the choice of a compliant ID/DL, or the status quo ID/DL we currently offer. **The bill as currently written removes our ability to offer a status quo ID/DL.**

Thanks, and let us know if you have questions.
