

Overview of the Alaska Salmon Price and Alaska Salmon Production Reports

Presented by the Alaska Department of Revenue, Tax Division
For House Fisheries Committee

May 11, 2017

Who files Price and Production Reports?

- Alaska Statute 43.80 requires salmon processors who sell at least 1 million pounds of salmon products at wholesale to file price and production reports, the filings are then aggregated at DOR, FISH Tax.
- Processors must file four reports during the calendar year:
 - One annual Production Report** showing the quantity of salmon products produced by the processor between Jan 1 and Dec 31, due Jan 31 of the following year.
 - Three tri-annual Price Reports** for monthly data of wholesale sales activity. Due dates are: May 31 for January – April period, September 30 for May – August period and January 31 for the September – December period. (In addition, DOR publishes an annual price report from this tri-annual data.)

What is reported?

- AS 43.80 identifies six reportable salmon product forms. The information to be reported on for these product forms is identified in the DOR forms and includes items such as species, reporting period, weight or cases, value, and other elements. The salmon product forms are:
 1. Thermally processed salmon products;
 2. Fresh headed and gutted salmon products;
 3. Fresh fillet salmon products;
 4. Frozen headed and gutted salmon products;
 5. Frozen fillet salmon products;
 6. Salmon roe products.

Purpose of Salmon Reporting

- To provide information about wholesale salmon prices and production to the public.
- Users of data should be aware that not all salmon products are required to be reported (salmon oil, salmon skins, salmon by-products).

Generating a Salmon Price Report

- Processors report monthly sales activity for each salmon species, product form and area of production (Southeastern and Yakutat, Kodiak, Bristol Bay, etc.).
- When all processors have filed price reports for a given period, DOR checks for data anomalies.
- Confidentiality tests are performed to prevent the publication of sensitive data.

Checking for data anomalies

We look for anomalies in processor salmon price reports, such as:

1. Over-reporting sales for a given month;
2. Prices per pound which seem unrealistic such as \$6.00/lb. for pink frozen headed and gutted.

Confidentiality Tests

- For a given month, species, product form and area, monthly total sales are reported if:
 1. There are three or more processors;
 2. No one processor over 80.0% of total value, and;
 3. No two processors over 95.0% of total value.

After data checks and confidentiality tests:

- DOR publishes the Salmon Price report. The report presented next is a tri-annual Alaska Salmon Price report for the period 9/1/2016 – 12/31/2016.
