Subject: HB 93 AK Railroad Right of Way

Rep. Knopp

The Taku Campbell Community Council fully supports this bill that you have presented on behalf of your community. Our Community Council has meet with members in the past two to three years over this issue of access to the property that they own and have used over the past 30 to 50 years or more.

The newer actions of the Alaska Railroad of charging for the usage of property was free to use in the past is not an issue. What we are getting is A safety issue by the Railroad. But if you the property owner pay us we will over look you and you can plant you trees or garden or whatever.

The Taku Campbell Community Council area is split in half by the Railroad and the members and the home owners, and business within the council are affected by the Railroad and its actions.

Sincerely

Ron Jordan, Chair Taku Campbell CC
