(discuss reasons and fund source(s) in analysis section)

ASSOCIATED REGULATIONS

Does the bill direct, or will the bill result in, regulation changes adopted by your agency? No
If yes, by what date are the regulations to be adopted, amended or repealed? n/a

Why this fiscal note differs from previous version:

Not applicable; initial version

Prepared By:	Michael Lamb	Phone:	(907)771-3009
Division:	Alaska Energy Authority	Date:	01/25/2017 01:00 PM
Approved By:	Catherine Reardon, Director	Date:	01/26/17
Agency:	Division of Administrative Services, DCCED		

FISCAL NOTE ANALYSIS

STATE OF ALASKA
2017 LEGISLATIVE SESSION

BILL NO. HB 80

Analysis

The legislation would provide the opportunity for local governments to create a Property Assessed Clean Energy (PACE) financing mechanism. PACE would incentivize energy efficiency improvements to commercial buildings by allowing a local government financing option as part of property tax assessments.

Thirty-three other states have created similar financing structures. Under a PACE program, interested business owners first have their buildings audited to determine potential energy savings. Then, they can apply for financing, including from traditional lending sources (loan programs, local lenders, etc.), that is repaid through an addition to their property tax assessment that may be in place for up to 20 years.

This legislation would allow local governments and businesses to opt-in on a voluntary basis to adopt PACE financing mechanisms. Lenders are provided with additional certainty of repayment while business owners are traditionally supportive because it allows them to finance improvements over an extended period of time with low-cost capital.

There is no fiscal impact to the Alaska Energy Authority, or the State of Alaska, with the passage of this proposed legislation.
