FISCAL NOTE ANALYSIS

STATE OF ALASKA
2019 LEGISLATIVE SESSION

BILL NO. SB037(HSS)

Analysis

This bill reauthorizes the statewide immunization program in the Department of Health and Social Services, which is scheduled to sunset January 1, 2021.

Established in 2014, the Alaska Vaccine Assessment Program is a public-private partnership that monitors, purchases and distributes all childhood and select adult vaccines to providers, making access to vaccines universal for all Alaskans at no cost to the state. In 2018, the program covered more than 333,000 Alaskans, 45 percent of the total population.

The Alaska Vaccine Assessment Program is fully funded by the state Vaccine Assessment Account through mandatory assessments from health plans and insurers. The Department of Health and Social Services manages the program and provides support to the Vaccine Assessment Council. The Council determines the assessment rate.

Private health insurers, third party administrators, and other program participants pay an assessment to the state based on the number of beneficiaries they cover. The State uses the assessments to purchase pediatric and adult vaccines at discounted rates off a bulk contract. The State then distributes the vaccines directly to healthcare providers at no additional charge to their patients. This program improves health and well-being while lowering overall vaccine costs by 20 to 30 percent.

Current budgeted authorization in the FY2020 Governor's Budget is \$10,500.0 from the Vaccine Assessment Account.
