Response & Repairs

- Earthquake drill last summer and strong culture of emergency planning
- No student, faculty or staff injuries
- Initial assessments on all buildings complete within 36 hours
- Swift action by facilities maintenance staff – Earthquake on Friday, Campus reopened on Tuesday
- Campus open in time for finals and commencement

UNIVERSITY *of* ALASKA
ANCHORAGE™

TOGETHER, WE ARE UNSTOPPABLE.

On November 30, the 7.0 earthquake that struck Alaska forced the University of Alaska Anchorage to close.

Five days later the Anchorage campus reopened. Students completed classwork, took finals and finished the semester on time and on track.

Today we congratulate more than 1,000 new UAA graduates, many of whom will walk the stage at UAA's Fall Commencement Ceremony at the Alaska Airlines Center.

Thanks to the UAA Community of students, faculty, staff, alumni and donors for coming together to make this happen so quickly. The devotion of the UAA Facilities team to student success allowed us to recover from the earthquake's damage in a short period of time. You are truly amazing.

THANK YOU.
